

Questions and Answers from the 10/28/24 Grassroots NOFA Technical Assistance Call

- Are you envisioning partners to begin at all three sites beginning in December?
 - There is some flexibility given the holidays but ideally we would at least start the onboarding process before the new year.
- Are you looking for partners to work at all three sites - would that make an application stronger? Or are you looking for multiple partners to work at different locations?
 - We are open to partners working in all three sites but the application review tool does not weigh that, so it wouldn't make an application stronger or weaker. It depends on capacity and alignment with the overall approach of the innovation team.
- How many organizations is DJS looking to award this grant? And would this be a one-time disbursement or in increments?
 - DJS is going to decide how many organizations to award this grant to based on applications and strongly weighing capacity of organizations to participate in this intensive systems-change work. The payments will be in increments via financial reports quarterly.
- Are you open to sub awardees?
 - No, we need organizations to apply who are looking to do the work themselves.
