Letter from the Governor...

Dear Friends:

It is my pleasure to present to you the Department of Juvenile Services' (DJS) FY 2014 Data Resource Guide.

DJS is an incredibly important agency that works in strong partnerships with the Department of Public Safety and Correctional Services and the Department of Human Resources to promote public safety, reform detention practices, and build relationships with a diverse group of youth.

Over the last few years, DJS Secretary Sam Abed has made great strides in providing quality services to our state's youth. That is why I asked him to continue in his role as Secretary of the Department of Juvenile Services in the Hogan-Rutherford administration. Secretary Abed is an experienced, pragmatic administrator who deeply cares for our state and our youth. I can think of no one better to continue to lead DJS into an even greater chapter.

Public safety is a priority for us all. With the help of Secretary Abed and the DJS, the Hogan-Rutherford administration looks forward to keeping communities safe, giving every youth the opportunity to succeed, and changing Maryland for the better. Thank you.

Sincerely,

Lawrence J. Hogan, Jr.
Governor

Lawrence J. Hogan, Jr.

A Word from the Secretary...

Welcome to the fourth edition of the Data Resource Guide (DRG). This past year, DJS continued to build on its previous successes and improved the ways the agency serves at-risk youth in Maryland. We expanded the CHOICE program and the Juvenile Detention Alternatives Initiative (JDAI) into Prince George's County, implemented the Under-13 diversion program in Baltimore City and Prince George's County, invested in alternatives to court through a model called Community Conferencing, started the Crossover Youth Model in Prince George's County, and continued a human sex trafficking screening process and avenue for services for youth identified as victims of sex trafficking.

Across the board, juvenile crime has been declining significantly over the last few years. The number of youth being referred to DJS has decreased as the number of arrests for violent, property, felony, and misdemeanor offenses have decreased. This reflects positively on not only the work of our dedicated staff, but collaborations that DJS has with law enforcement, local agencies, and state agencies like the Maryland State Department of Education, Department of Human Resources, and Department of Health and Mental Hygiene, that have made investments in education, early childhood development, and nutrition.

In an effort to promote information sharing, each year more detailed data are added to the DRG. This year, we have added a new section titled, "Youth Charged as Adults." While DJS usually works with youth in the juvenile justice system, youth under the age of 18 who have been charged as adults in the criminal system may be legally permitted, in certain situations, to reside in a secure juvenile facility while they wait for their court date. The new data for youth charged as adults will be helpful to DJS as we continue to work with this population.

At DJS, we are constantly trying to improve our procedures, initiatives, and interventions with the sole focus on helping DJS youth become productive members of their communities. Ultimately, DJS' success is tied to the success of our youth. I would like to thank everyone involved in the creation of this publication, especially DJS' Research & Evaluation Department, who analyzed and compiled the data. This book is the cornerstone of our management philosophy of making data-driven decisions and it provides transparency so everyone can see our critical performance indicators in a meaningful way.

Sincerely,

Sam Abed

Sam Abed

Terms and Concepts

Absent Without Leave (AWOL): A youth who absconds from a non-secure residential program.

Adjudicatory Hearing: Proceeding before a juvenile judge or master to determine the truth of allegations made against a youth. If the allegations concerning the commitment of a delinquent act are found to be true, the youth may be adjudicated delinquent.

Aftercare: Supervision and individualized treatment services provided to youth in the community following discharge from a residential program.

Automated Statewide System of Information Support Tools (ASSIST): DJS client database.

Average Daily Population (ADP): Daily population of youth in residential placement (state or privately owned) averaged over the number of days in the year.

Average Length of Stay (ALOS): Average total number of days in residential placement between admission and release. Youth detained in more than one facility during a contiguous stay are counted as a single placement.

Case Management Specialist (CMS): DJS staff who provide case management services to youth in community and residential settings. Case managers provide supervision, develop treatment plans, link youth with necessary resources and services, monitor progress, and modify treatment plans as needed.

Central Review Committee (CRC): A central committee, authorized under the Continuum of Care Legislation, that convenes weekly to hear case reviews of youth at risk of removal from a committed placement, direct changes in the youths' provision of services, and make youth placement transfer decisions. Members include the Directors of the Behavioral Health and Resource Offices, the Executive Directors of Residential Placements and Community Supervision, and a representative from MSDE.

Certificate of Placement (COP): The document which reflects a youth's placement location, services, and authorizes payment for services.

CHALLENGE: A behavioral management program implemented in DJS' residential facilities with the goal of developing pro-social behavior and individual accountability/responsibility using a token economy and social skills education to incentivize positive behavior.

Child In Need of Assistance (CINA): A youth who has been physically, sexually, or emotionally abused or neglected by a parent or other person responsible for the youth's care.

Child In Need of Supervision (CINS): A youth who commits an offense that, if committed by an adult, would not be a crime (e.g. truancy, run-away or "ungovernable").

Commitment versus Admission: A commitment is a court order placing a delinquent youth in DJS' care. The youth is usually placed into an out-of-home program, but may also be provided services at home. An admission occurs when a juvenile physically arrives at a facility and is officially entered into the facility's rolls. An admission may occur days/weeks after the juvenile is committed to DJS (in the interim, a youth is considered to be on "pending placement" status – see Pending Placement). A single admission to an out-of-home program could be the result of multiple commitments (e.g. a juvenile may be committed by more than one court, or have multiple charges with "committed" dispositions). Thus, the number of commitments will not equal the number of admissions to committed programs.

Community Detention (CD): A program monitored by the Department in which a delinquent child or a child alleged to be delinquent is placed in the home of a parent, guardian, custodian, or other fit person, or in shelter care, as a condition of probation or as an alternative to detention (ATD). Community detention includes electronic monitoring.

Complaint: A written statement made by any person or agency to a DJS intake officer, which if true would support allegations of a juvenile petition.

Continuum of Care: The continuum of care spans in-home probation supervision with services, community-based out of home treatment, and state and privately-operated secure programs, all designed to address youth needs, and the factors that led the youth to delinquent behavior. Legislation passed in 2012 authorized DJS to transfer youth directly from one facility/program to another facility/program (of equal or higher security level) without first asking the court to modify the commitment order.

Day/Evening Reporting Center (D/ERC): A program that serves youth as an alternative to detention. Youth are required to report daily to ensure the youth is monitored and gets back to court for hearings.

Delinquent: A youth who has been adjudicated for an act which would be a crime if committed by an adult and who requires guidance, treatment, or rehabilitation.

Detention: Temporary, short-term (1-30 days) physically secure housing of youth who are awaiting court disposition and require secure custody for the protection of themselves or the community and/or to ensure court appearance.

Detention Hearing: A court proceeding to determine whether a youth shall be placed in or continued in detention.

Detention Risk Assessment Instrument (DRAI): An assessment of a youth's risk to reoffend and/or fail to appear for future court dates used to guide whether the youth should be detained, placed in a detention alternative, or released to a parent/guardian.

Direct Care Staff: An employee whose primary duty is to provide direct supervision of youth.

Disposition: The action taken by the juvenile court that outlines whether the youth requires guidance, treatment, or rehabilitation and, if so, the nature of such assistance that an adjudicated youth will receive. (Note: In adult courts, this is known as a "sentence.")

Disproportionate Minority Contact (DMC): A rate of contact with the juvenile justice system among youth of a specific minority group that is significantly different than the rate of contact for whites (i.e., non-Hispanic Caucasians) or for other minority groups (*See RRI definition*).

Ejection from Committed Placement: A youth's removal from an out-of-home placement upon determination that he/she failed to comply with the rules and conditions of the program. Following an ejection a youth may require a new out-of-home placement. A youth may remain in detention pending a new placement.

Electronic Monitoring (EM): A statewide program providing close monitoring of youth in the community as an alternative to residential placement/detention. Youth wear an ankle bracelet that electronically monitors their movement and compliance to established location parameters. This may involve the use of global positioning systems (GPS).

Escape: Absconding from a residential program, which can include Community Detention.

Evidence Based Services (EBS): Programs that have been found to be effective based on the results of rigorous evaluations.

Family Centered Treatment (FCT): A family preservation model of in-home treatment provided by Institute for Family Centered Services, Inc (IFCS). The IFCS team utilizes FCT to help families learn and adopt positive behavioral patterns.

Felony vs. Misdemeanor: In Maryland a crime is either a felony or a misdemeanor. Generally, felonies are the more serious of these two types of crimes. However, there is no clear line for determining whether a crime is a felony or misdemeanor based on the statutory maximum penalty associated with the offense. Unless specified in a statute or the offense was a felony at common law, a crime is considered a misdemeanor. Most statutes specify whether a crime is a misdemeanor or a felony. Common law crimes retain common law grades as either felonies or misdemeanors unless changed through the legislative process. The General Assembly may choose to label a statutory crime a felony or misdemeanor independent of the amount of punishment the statute provides. The General Assembly may also choose to change the status of a crime from a misdemeanor to a felony or a felony to a misdemeanor.

Fiscal Year (FY): The time period measured from July 1st of one year to June 30th of the following year. FY 2014 runs from July 1, 2013 through June 30, 2014.

For Authorization of Formal Petition (FAFP): DJS has statutory authority to screen all juvenile complaints referred. A case not resolved or diverted through an informal agreement by DJS intake officers will result in an FAFP that requests the juvenile court take action on the complaint.

Functional Family Therapy (FFT - an EBS): An outcome-driven prevention/intervention program for youth demonstrating the entire range of maladaptive behaviors such as delinquency, violence, substance use, Conduct Disorder, Oppositional Defiant Disorder, or Disruptive Behavior Disorder. Flexible delivery of service is provided by one or two person teams to clients in home, clinic, school, juvenile court, community-based programs, and at re-entry from institutional placement.

Global Positioning System (GPS): A global navigation satellite system that provides location and time information for youth monitored with a global positioning system receiver.

Group Home: A residential program licensed by DHR, DJS or MHA/DHMH to provide 24-hour supervised out-of-home care for 4 or more youth providing a formal program of basic care, social work, and health care services.

Hardware Secure Facility: A facility that relies primarily on the use of construction and hardware such as locks, bars, and fences to restrict freedom.

Informal (or “Pre-Court”) Supervision: An agreement between DJS and a youth and family to enter into counseling and/or DJS monitoring without court involvement.

Intake: The process for reviewing a complaint against a youth and determining whether the juvenile court has jurisdiction and whether judicial action is in the best interest of the public and/or the youth. During intake, youth and their family may be offered services.

Juvenile Court: A division of the Circuit Court in Maryland.

Juvenile Detention Alternatives Initiative (JDAI): A best practice model that addresses inappropriate and unnecessary use of detention and reduces the failures of juveniles to appear in court. A primary goal of JDAI is to reduce overcrowding in detention centers by safely maintaining youth in the community in detention alternatives without jeopardizing public safety or increasing the number of youth who fail to appear for court.

Juvenile Justice Monitoring Unit (JJMU): The Unit, administratively housed in the Office of the Attorney General, investigates the needs of children under the jurisdiction of DJS and determines whether their needs are being met in compliance with State law. This includes evaluating conditions of facilities housing youth, reporting on treatment of and services to youth, and investigating allegations of child abuse.

Maryland Comprehensive Assessment and Service Planning (MCASP): MCASP uses integrated case management to assess youth’s risks and needs throughout their DJS involvement and develop interventions to accomplish the goals of public safety and youth rehabilitation. MCASP enables DJS to strengthen individualized service plans for youth and families and match them with appropriate services/programs; to track youth progress; and to ensure that each youth receives the level of supervision consistent with his or her risk to public safety.

Maryland Police and Correctional Training Commissions (MPCTC): Under DPSCS, MPCTC is vested with the authority to set standards of initial selection and training for all governmental law enforcement, correctional, parole and probation, and juvenile services employees in the State of Maryland, and to otherwise upgrade the professionalism of these officers. MPCTC provides certification and on-going training to DJS staff.

Multidimensional Treatment Foster Care (MTFC - an EBS): A cost-effective alternative to group or residential treatment, committed placements, and hospitalization for youth with chronic anti-social behavior, emotional disturbance, and delinquency. Community families are recruited, trained, and closely supervised to provide youth with treatment and intensive supervision at home, in school, and in the community; clear and consistent limits with follow-through on consequences; positive reinforcement for appropriate behavior; a relationship with a mentoring adult; and separation from delinquent peers.

Multidisciplinary Assessment Staffing Team (MAST): A specialized regional diagnostic team responsible for assessing and evaluating youth who are detained and at risk of out-of-home placement, prior to disposition. Following the in-depth review, the MAST prepares security and treatment recommendations to the juvenile court. The MAST includes a psychologist, social worker, community and facility case managers and supervisors, resource specialist, MSDE, and individuals from other disciplines as needed.

Multisystemic Therapy (MST - an EBS): An intensive family- and community-based treatment program that addresses the serious anti-social behavior of juvenile offenders. The major goal of MST is to empower parents and youth with the skills and resources needed to independently resolve the difficulties that arise in coping with family, peer, school, and neighborhood problems. Intervention strategies include family therapy, structural family therapy, behavioral parent training, and cognitive behavior therapies. MST is a home-based model of service delivery.

Operation Safe Kids (OSK): A collaboration between the Baltimore City Health Department, DJS, and other state and city agencies to provide intensive community-based case management and monitoring of high-risk juvenile offenders to prevent them from becoming victims/perpetrators of violent crimes and to ensure they have tools to become productive adults.

Pending Placement: A temporary placement status for youth who have been committed for placement in an out-of-home residential facility and are awaiting placement. Youth may be pending placement in a variety of settings including: detention; home; home with additional services; home under community detention; and/or electronic monitoring; family shelter care; structured shelter care; acute care hospitals; or psychiatric respite care programs.

Petition: A formal written request filed with the juvenile court alleging that a child is delinquent, in need of supervision (CINS) or in need of assistance (CINA).

Placement versus Admission: A placement is based on a decision made by an intake officer or judge to place a youth into detention or a committed program. An admission occurs when a youth physically enters a facility either through direct placement or through transfer. Thus, during one placement, a youth may have several admissions and these counts will not match.

Pre-Adjudication Coordination and Training (PACT): PACT Evening Reporting Center serves youth 14 to 17 years of age in Baltimore City as an alternative to detention. It utilizes a youth development model and works to collaborate with participants, their families, DJS, and other partners to develop a plan to address the underlying issues which lead to anti-social or delinquent behavior.

Probation: Court-ordered supervision of youth in the community requiring youth to meet court-ordered probation conditions (general and case specific), including, for example, school attendance, employment, community service, restitution, counseling, or participation in substance abuse treatment.

Recidivism: Subsequent juvenile/adult criminal involvement of youths released from committed residential programs/placed on probation.

Relative Rate Index (RRI): A measure of Disproportionate Minority Contact (DMC) with the juvenile justice system. It is a standardized tool for measuring disproportionality at the various contact points (arrest, court referral, etc.) that youth have with the police and DJS. For example, RRI compares the arrest rate for White youth with the arrest rate for youth of a specific minority group. In its simplest form, the RRI is simply the rate of activity involving minority youth divided by the rate of activity involving majority youth.

Resident Advisor: DJS staff position that provides supervision, support, care and monitoring of youth placed in DJS-operated facilities.

Residential Treatment Center (RTC): A mental health facility for children and adolescents with long-term serious emotional, behavioral, and psychological problems. RTCs provide intensive services and should only be considered when therapeutic services available in the community are insufficient to address a youth's needs. In addition to Maryland RTCs, DJS uses a variety of out-of-state providers including RTCs funded through Medical Assistance, with rates set by the Maryland Interagency Rates Committee, and facilities that are not RTCs and serve moderate-to-high-risk multi-problem youth. These are youth who may be exhibiting moderate psychiatric symptomatology and aggressive behavior, or who have histories of unsuccessful/repeated placements and/or hospitalizations. Treatment models vary depending on the client focus of the program but all provide individualized treatment plans, are comprehensive in services, highly structured, treatment oriented and behaviorally focused.

Resolved at Intake: A determination that furthering the case by forwarding it to the State's Attorney's Office for formal processing would be disadvantageous to the interests of the youth and to public safety.

SafeMeasures: An analytic service provided to DJS by the National Council on Crime & Delinquency to improve its community case management system. SafeMeasures pulls data from DJS's existing databases and creates visual indicators and reports to ensure that case managers and supervisors are meeting the agency's requirements for effective community supervision.

Shelter Care: Temporary, short-term (1-30 days), non-secure housing of youth who are awaiting court disposition. Shelter beds serve as an alternative to detention or other short-term circumstance where family or other housing is not available.

Social History Investigation (SHI - formerly PDI): The written study of a youth and his/her family that is presented to the juvenile court. A Social History Investigation emphasizes social and legal histories as well as the domain areas of: family functioning, substance abuse, mental health, somatic health, education, employment, and life skills.

Spotlight on Schools (SOS) Program: An initiative to place case managers on-site at certain key schools across the state. DJS Spotlight workers monitor and respond immediately to attendance issues, referrals for disruptive behavior, suspensions, and drop-out issues for youth under DJS supervision, and offer prevention and early intervention services to other at-risk students. In addition, SOS workers provide immediate, on-site intake services for students involved in delinquent activity.

Staff Secure: Residential programs where youth movement is controlled by staff supervision rather than by restrictive architectural features.

State Advisory Board: The Board consists of 19 members appointed by the Governor for three-year terms. The Board recommends to the Secretary of Juvenile Services policies and programs to improve State juvenile services. The Board helps plan development, use of resources, and helps inform the public of the Department's work.

Statewide Maryland Automated Records Tracking (SMART): A web-based tool used to provide a consent-driven client tracking system for both state agencies and private treatment providers.

Treatment Service Plan (TSP): A written document identifying treatment objectives, services, and service linkages that address the needs of the youth and family. It also examines the safety and appropriateness of the youth's placement, guides DJS's recommendations to the juvenile court for permanency planning (where appropriate), and monitors level of supervision and services required.

Under 13 (U-13) Initiative: A school-based intervention designed to provide support and services for juvenile offenders ages 12 years and younger through collaborative partnerships between DJS, Baltimore City Public Schools, the local Department of Social Services, and other child-serving stakeholders.

Ungovernable: Defined by the Juvenile Court Statistics as being beyond the control of parents, guardians, or custodians or being disobedient of parental authority (i.e. CINS juveniles who are truants from school, violate curfew laws, or run away are ungovernable).

Violence Prevention Initiative (VPI): Implemented in January 2008, VPI provides intensified levels of supervision and targeted services for youth at highest risk of being victims/perpetrators of crimes of violence. This Initiative incorporates a level system and continuum of graduated responses to ensure that immediate and appropriate actions are consistently applied when youth are non-compliant.

Youth: The preferred term for individuals under 18 years of age as used by DJS.

Section I: An Overview of the Maryland Department of Juvenile Services

As part of National Crime Victims' Rights Week, DJS put together an art exhibit called Inspire, Change, Restore Youth.

Introduction to the Maryland Department of Juvenile Services

The Department of Juvenile Services (DJS) is an executive agency whose primary task is to appropriately manage, supervise and treat youth who are involved in the juvenile justice system in Maryland. DJS provides individualized care and treatment to youth who have violated the law or who are a danger to themselves or others. Objective screening and assessment tools are utilized to manage youth with the guidance of the data collected, and DJS works with partners in the community to achieve meaningful improvements to the outcomes of the youth we serve.

OBJECTIVE ASSESSMENT TOOLS

Objective screening and assessment tools are used to guide key decision points. The Detention Risk Assessment Instrument (DRAI) evaluates whether a youth should be held in secure detention or a supervised detention alternative while awaiting a hearing on the merits of a juvenile complaint. This tool helps the Department improve its detention practices by taking subjectivity out of the critical detention decision, with a goal of detaining only those youth who pose a risk to public safety, to themselves, or who would not otherwise appear in court.

DJS Intake Officers are also statutorily empowered to screen juvenile offenses and determine which complaints should be referred to the State's Attorney's Office for formal court petitioning. This decision is guided by a risk assessment tool that is part of the Maryland Comprehensive Assessment and Service Planning (MCASP) process. It factors in a youth's history of delinquency, history of social risk factors, and the seriousness of the current offense(s) to identify those cases requiring court action.

If a youth has been adjudicated delinquent, the Department then utilizes the MCASP Needs Assessment to identify the youth's treatment and security needs, and serves as the basis for the Treatment Service Plan (TSP) development. Using an objective instrument allows the Department to make better matches between youth and the course of treatment available within the continuum of care. The continuum of care spans in-home probation supervision with services, community-based out-of-home treatment, and state and privately-operated secure programs, all designed to address youth needs, and the factors that led the youth to delinquent behavior.

MANAGING WITH DATA

The information developed from assessment tools as well as information collected by caseworkers, investigators, auditors, and facility staff is used in all levels of DJS management. Data reports are available to field staff and managers through the ASSIST and SafeMeasures reporting systems. Data is also regularly analyzed by the Office of Research and Evaluation, generating reports for agency decision makers, the Governor's Office (through the StateStat process), and reports to the Maryland Legislature. This *Data Resource Guide* represents the most comprehensive report of the Department's data. Locally specific information is now readily available to all. This is crucial for practitioners because statewide trends could mask individual local trends that run counter to conventional wisdom. As innovative new ways of examining our information are uncovered, they will be incorporated into this publication.

COMMUNITY PARTNERSHIPS

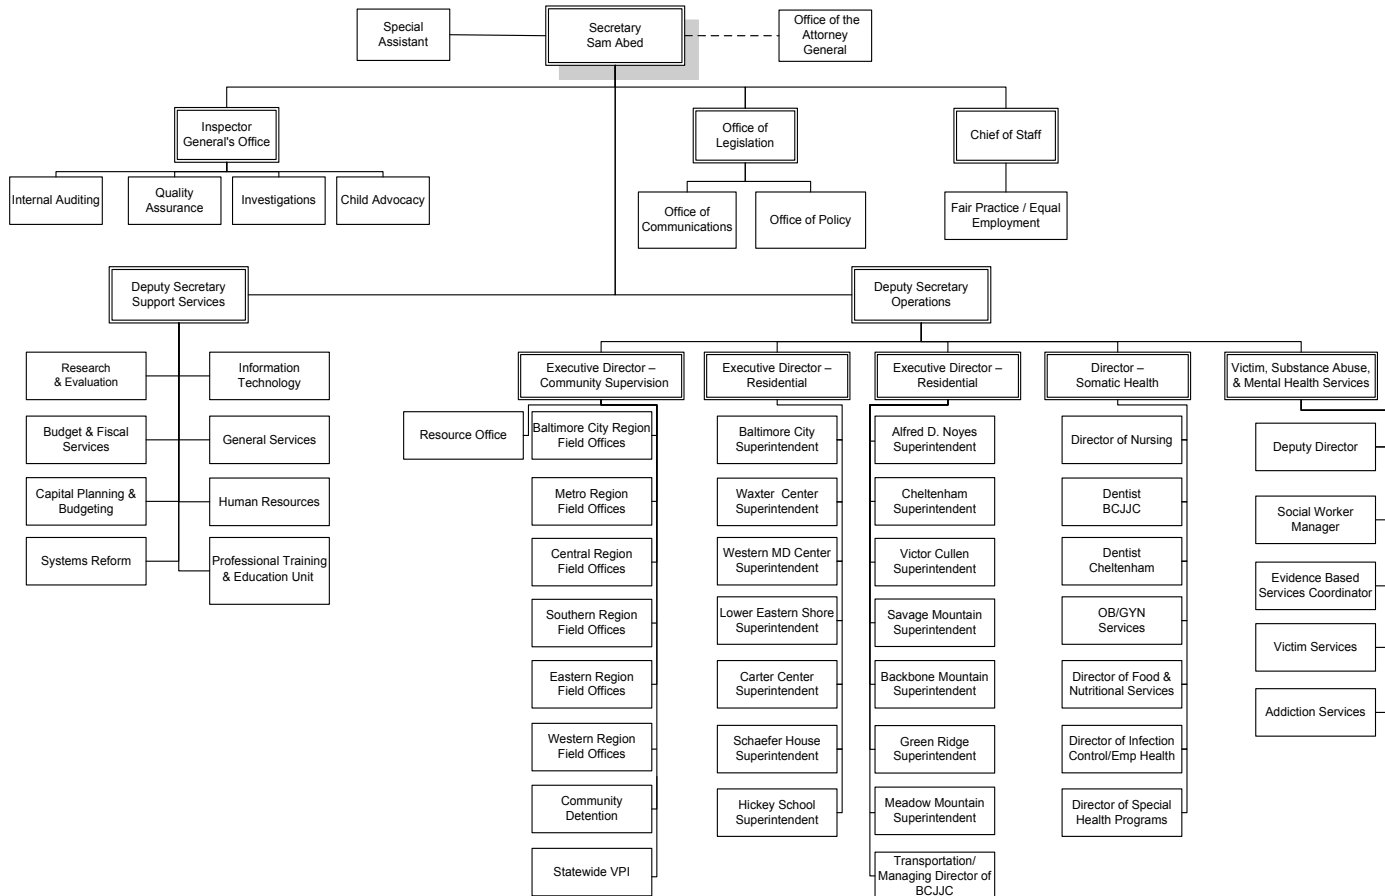

DJS' partnerships start in the community at the field offices. In each locality throughout the state, DJS employs staff who work with the courts to provide intake services, supervision of youth, and recommendations to the court on detention as well as placement into care. Field staff work with community-based treatment providers to develop a range of offerings that meet the needs of youth in that community. State partners, such as the Maryland State Department of Education (MSDE), the Department of Human Resources (DHR) and the Department of Health and Mental Hygiene (DHMH) collaborate at many levels to deliver services in the most effective manner. DJS also works closely with the Maryland State Police, local law enforcement agencies in Maryland and in surrounding jurisdictions, and the Governor's Office of Crime Control and Prevention (GOCCP) to ensure information is shared across agencies, and public safety goals are met.

MISSION OF THE MARYLAND DEPARTMENT OF JUVENILE SERVICES (DJS)

By law, DJS is a child-serving agency responsible for assessing the individual needs of referred youth and providing intake, detention, probation, commitment, and aftercare services.

DJS collaborates with youth, families, schools, community partners, law enforcement, and other public agencies to coordinate services and resources to contribute to safer communities.

Organizational Chart As of FEBRUARY, 2014

Agency Organization

The Department of Juvenile Services serves the entire state by providing support for community programs and services, community supervision and case management, and custody and care of committed juveniles.

Headquarters, located in Baltimore City, houses the Office of the Secretary and functions as the hub for all support services.

Administered by the Secretary, agency functions are divided among the following:

- The Secretary oversees the Chief of Staff, Deputy Secretaries, Office of the Inspector General, and the Offices of Legislation, Policy, and Communication.
- The Chief of Staff oversees the Office of Fair Practice/Equal Employment Divisions.
- The Deputy Secretary for Support Services manages the following offices: Budget & Fiscal Services, Capital Planning & Budgeting, General Services, Human Resources, Information Technology, Juvenile Detention Alternatives Initiative (JDAI) and Disproportionate Minority Contact (DMC) functions (Systems Reform), Research and Evaluation, and Professional Training and Education.
- The Deputy Secretary for Operations oversees operations that provide community-based services to youth and families, including community detention, field offices, and Statewide Violence Prevention Initiative (VPI) efforts. She also oversees residential operations, including the managing director of Baltimore City Juvenile Justice Center (BCJJC)/transportation services, as well as Somatic Health, Victim, Substance Abuse, and Mental Health Services.

Vision Statement

Successful Youth, Strong Leaders, Safer Communities

DJS Goals

1. Reduce violence against children through collaboration with law enforcement and other agency partners.
2. Reduce recidivism for supervised or committed youth.
3. Keep supervised and committed youth safe while holding youth accountable for their actions.
4. Promote continuums of care for referred and delinquent youth.
5. Build, maintain and empower a diverse, competent, and professional workforce.
6. Enhance the quality, availability and use of technology.

DJS Values

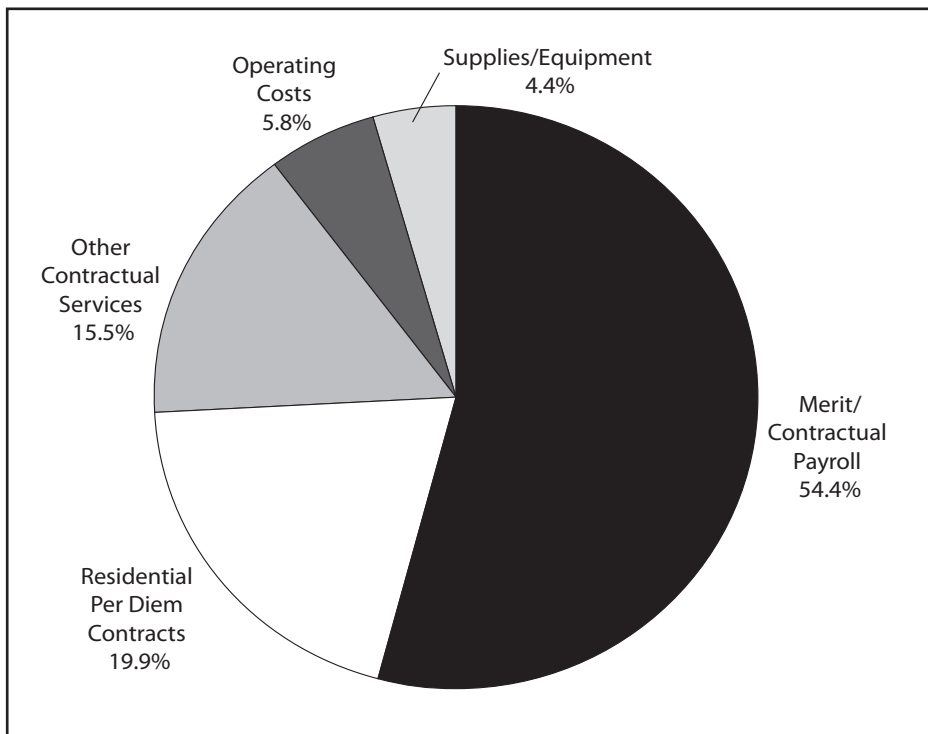

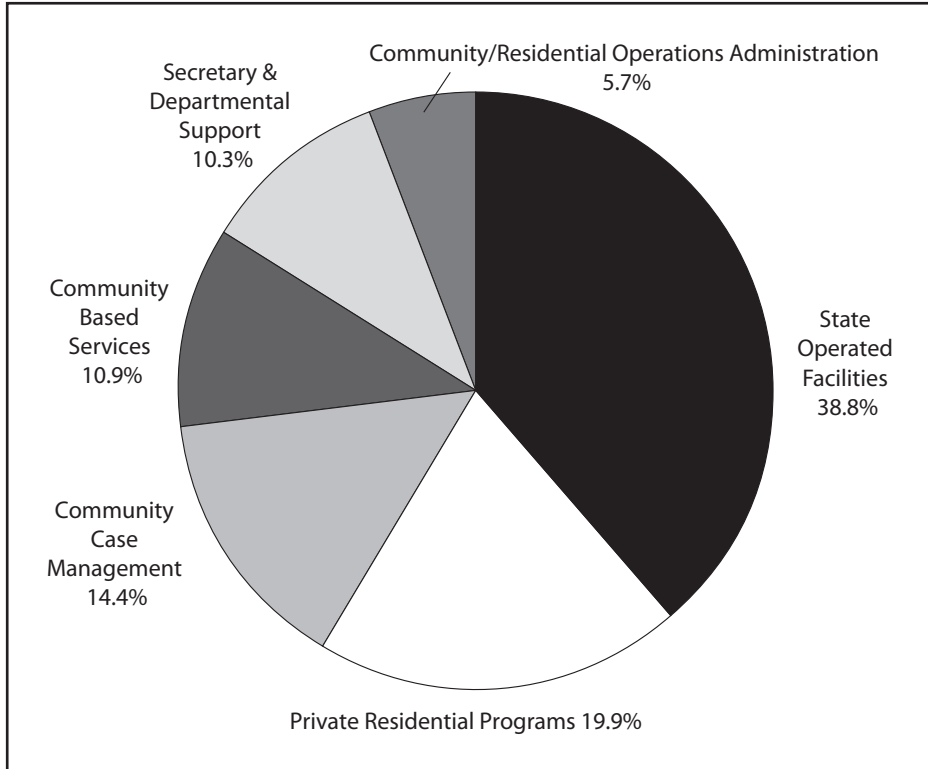

- We value the safety of the citizens of Maryland and the fair, safe, and humane treatment for all youth in our care.
- We value the families, communities, stakeholders, and staff who support positive change in our youth.
- We value the experience, expertise, diversity, and integrity of our staff.
- We value fairness and cultural competence regardless of race, ethnicity, gender, sexual identity, or religion.
- We value creating opportunities for youth and families to promote positive growth and development.
- We value a community-based approach with the least restrictive appropriate interventions.
- We value continuous improvement and learning in all individuals.
- We value excellence, innovation, and quality practices based on data and research.
- We value change for the growth opportunities it brings.
- We value accountability.
- We value collaboration and teamwork.

DJS Operating Expenditures, FY 2014

During the fiscal year ending June 30, 2014, the Department expended a total of \$287.8 Million. The first pie chart reflects the major cost centers for which these funds were expended and the second shows the expenditures by major object group.

Percentages may not add to 100% due to rounding.

Juvenile Justice in Maryland – A Historical Evolution

1800s

- Maryland Legislature passes “An Act to Establish a House of Refuge for Juvenile Delinquents” creating for the first time an authority to provide troubled children with homes, education, and job training (1830).
- House of Refuge opens (1850).
- Maryland builds four “reform schools” for young people, governed by private boards and segregated by race and sex (1850-1882)
- Maryland Industrial School for Girls opens (1866), and is operated under various names, finally as the Montrose School, and closing in 1988.
- House of Reformation & Instruction for Colored Children opens (1870). It operated under various names, renamed to the Cheltenham Youth Facility in 1992.
- Industrial Home for Colored Girls opens (1882). Merged with Montrose School for Girls in 1962.

1910-1918

- House of Refuge (opened in 1850) becomes Maryland School for Boys (1910) and in 1918 becomes the Maryland Training School for Boys.

1922

- State Department of Education operates the training schools.

1943

- State Department of Public Welfare, Bureau of Child Welfare, Division of Institutions operates the training schools.

1960s

- 1966-1969: State Department of Juvenile Services becomes the central coordinating agency for juvenile investigation, probation and aftercare services, and for State juvenile, diagnostic, training, detention, and rehabilitation institutions.
- 1967: State Department of Juvenile Services assumes administrative responsibilities for all State children’s centers and boys forestry camps.
- 1968: Patterson House (Group Home for Girls) opens. It closes in 1992.
- 1969: Department of Health and Mental Hygiene, organizes the Juvenile Services Administration to administer all schools, youth detention centers, forestry camps, and probation/aftercare programs.

1970s

- 1970: Alfred D. Noyes Children’s Center opens in Montgomery County.
- 1972: Group Home for Boys opens, becoming the William Donald Schaefer House in 1992.
- 1972: Maryland Youth Residence Center opens.

1980s

- 1982: J. DeWeese Carter Center opens.
- 1985: Maryland Training School for Boys becomes the Charles H. Hickey, Jr. School.
- 1987: Juvenile Services Administration becomes an independent agency.
- 1989: The Department of Juvenile Services becomes a cabinet-level department.

1990s

- 1992: Victor Cullen Academy, which was a former tuberculosis sanatorium, opens.
- 1992: Boys’ Village of Maryland renamed to Cheltenham Youth Facility.
- 1999: In November, DJS replaces its existing mainframe application, Information System for Youth Services (ISYS), with a client-server system referred to as the Automated Statewide Support and Information Systems Tools (ASSIST).

2002

- Victor Cullen Academy closes.
- HB 1081 - Requires the establishment of a community detention program.
- HB 1011 - Requires the Department to operate the Baltimore City Juvenile Justice Center as a centralized regional juvenile justice intake, assessment, court, and detention facility for Baltimore City and specified the powers and duties related to the Center.
- HB 962 - Authorizes the juvenile court to adopt a treatment service plan recommended by the Department in making a disposition on a specified petition. It also requires the Department to ensure that a treatment service plan adopted by the court is implemented within 25 days after disposition.

2003

- Baltimore City Juvenile Justice Center (BCJJC) opens in October.

Juvenile Justice in Maryland – A Historical Evolution (continued)

2004

- Day/Evening Center in Baltimore City opens in December.
- SB 767 /HB 1141 - Requires a child discharged from a committed residential placement receive step-down aftercare according to specified parameters.

2005

- Charles H. Hickey, Jr. School Committed and Impact Programs closes in July.
- HB 1339 - Requires the Secretary of Juvenile Services to establish a Child in Need of Supervision Pilot Program in Baltimore City and County.

2007

- Victor Cullen Center reopens in July.
- Maryland Youth Residence Center (MYRC) closes in October.
- SB 359 - Reorganization and Regionalization requires DJS to serve youth with specified programming that delivers services on a regional basis.
- Thomas O'Farrell Youth Center closes in December.

2008

- Group Home Reform - Keeping Maryland Youth in Maryland Per Diem Reduction Initiative.
- Violence Prevention Initiative (VPI) begins in Baltimore City in January and statewide in November.
- Opens Day/Evening Reporting Center in Prince George's County in November.
- SB 742 - Provides that all contracted residential child care programs must post a "Residents' Bill of Rights" in the facility and provide residents and their parents/guardians a handbook of the policies of the provider.

2009

- Collaboration with Operation Safe Kids to serve VPI youth in Baltimore City and Prince George's County.
- Silver Oak Academy opens (private provider serving only DJS youth).

2010

- Child Safety Net Dashboard launches in February.
- HB 1382 - Allows DJS to share juvenile information and collaborate with juvenile justice agencies in the District of Columbia and Virginia.

2011

- SB 62 - Authorizes the State Department of Education and the Department of Juvenile Services to share educational records when necessary to ensure the appropriate delivery of services.
- HB 1190 - Expands the Child in Need of Supervision Pilot Program to include Cecil County, Montgomery County, and Prince George's County.
- The committed female population moves from Waxter Facility to J. Deweese Carter Center in November
- CHALLENGE behavioral management program is implemented at Carter Center in November. CHALLENGE is designed to change youth behaviors, decision-making, and belief system to support the development of pro-social skills by using clear behavioral expectations within a structured daily routine with positive reinforcers. Ultimately, youth learn that their behaviors and actions are their responsibility.

2012

- SB 245 - Allows DJS to begin to develop a continuum of care by granting the agency the ability to move youth between committed placements.
- CHALLENGE is implemented at Victor Cullen Center in March, the Youth Centers in August, and William Donald Schaefer House in October 2012.
- Central Review Committee is formed to implement the terms of SB 245 and commences its operation in July.
- DJS begins screening for victims of human sex trafficking at the Thomas J.S. Waxter Children's Center in March. The human trafficking screening tool is expanded to the Alfred D. Noyes Children's Center in December.

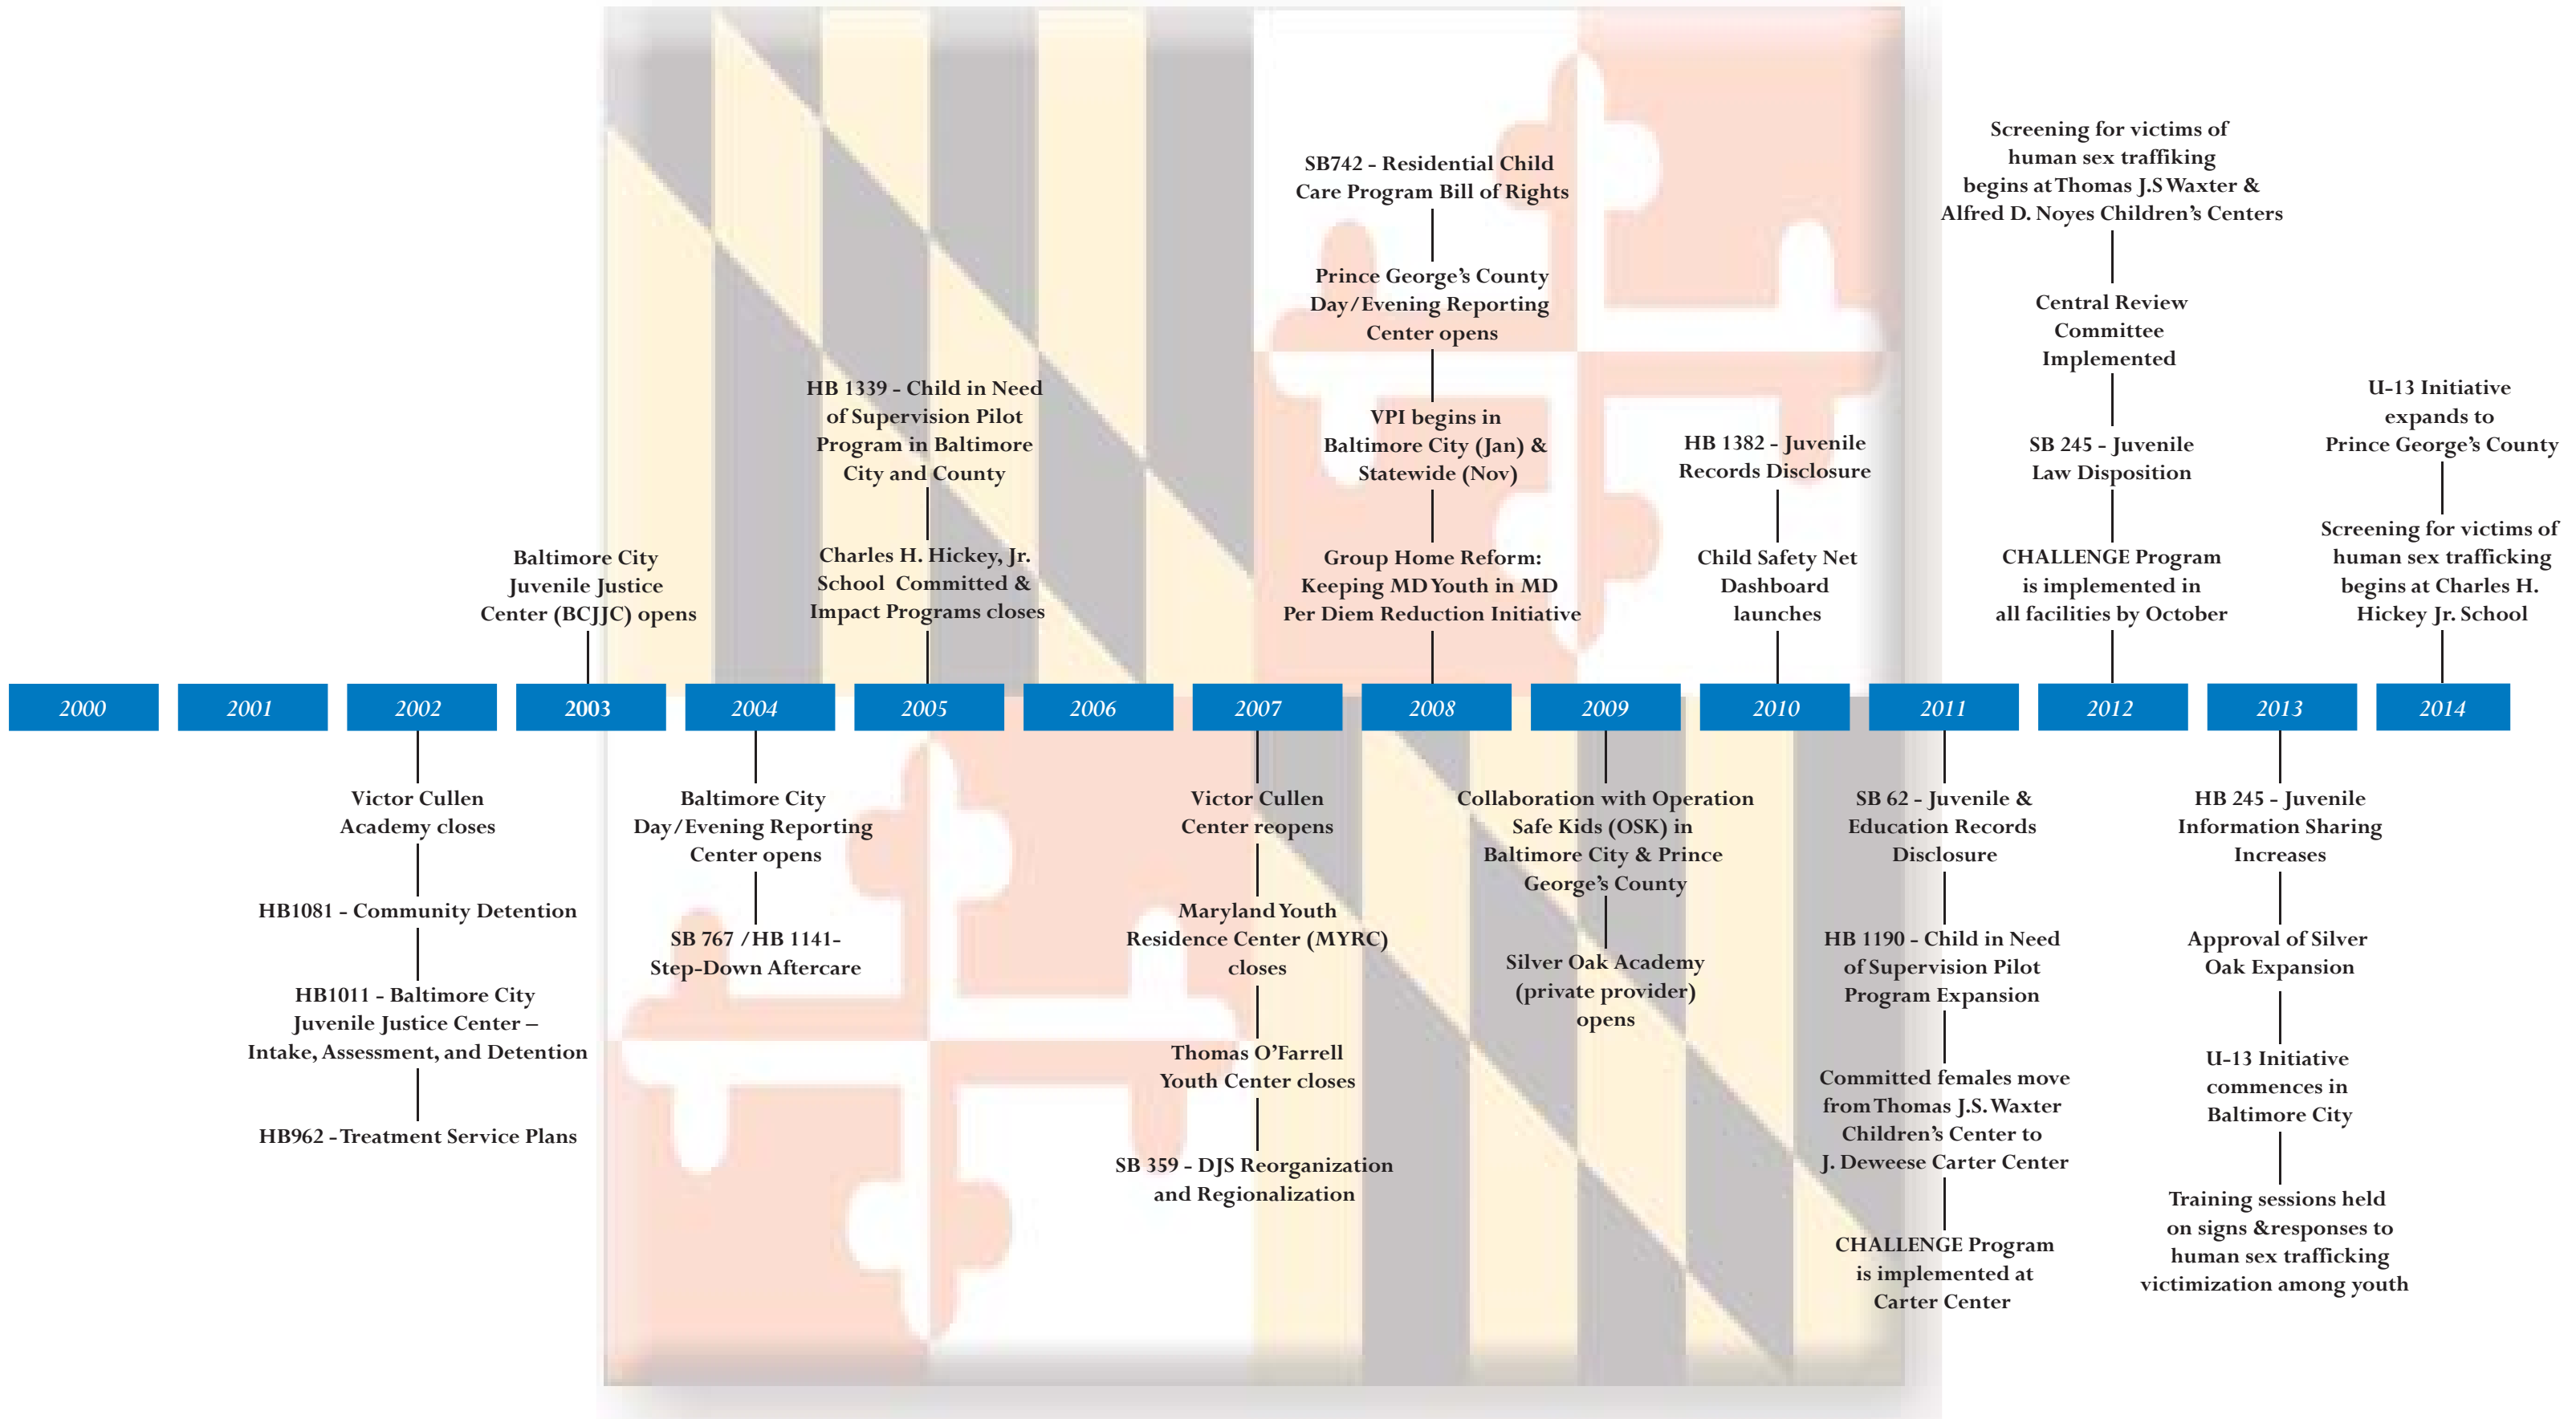

2013

- HB 245 - Expands DJS's ability to share juvenile information and collaborate with juvenile justice agencies in Delaware, Pennsylvania and West Virginia.
- Silver Oak Academy receives approval to increase their treatment capacity from 48 beds to 96 beds.
- Under-13 (U-13) Initiative commences in Baltimore City in May. The U-13 Initiative is a school-based intervention designed to provide support and services for juvenile offenders ages 12 years and younger through collaborative partnerships between DJS, Baltimore City Public Schools, the local Department of Social Services and other child-serving stakeholders.
- From March to May, over 56 training sessions are held where approximately 1,100 Department employees learn to recognize the signs of possible human sex trafficking victimization among youth involved in the juvenile justice system and apply appropriate responses to support possible victims.

2014

- The Department begins screening for victims of human sex trafficking at the Charles H. Hickey Jr. School in March.
- The U-13 Initiative expands to Prince George's County in May.

STEPS IN THE JUVENILE JUSTICE SYSTEM

1. Youth can be referred to DJS by law enforcement, schools, and parents. Some police departments run diversion programs, and only those youth who fail out of the program would be referred to DJS.
2. DJS makes an emergency detention decision to determine if a youth requires secure detention until the next court day. This decision is guided by a Detention Risk Assessment Instrument (DRAI).
3. The intake complaint is assessed by an intake officer, who has statutory authority to determine how the case should be handled. The options are:
 - Resolved, when it is determined that furthering the case would be disadvantageous to the interests of the youth and to public safety.
 - Informal adjustment, where the family signs a 90-day agreement to certain conditions without court involvement. This is the main DJS court diversion program.
 - Formally authorize the State’s Attorney to petition the juvenile court for a hearing.
4. At the detention hearing, the juvenile court determines if detention is required until the adjudicatory or dispositional hearing. Youth may also be detained directly by the juvenile court in cases where the youth is presented during court hours, either on a new charge, a writ or warrant, or due to a violation or sanction of a supervision order (probation, community detention, drug court, etc). All secure detention centers are operated by DJS.
5. Youth who present a lower risk may also be supervised in programs providing alternatives to secure detention. These programs ensure that the youth is available to attend the adjudicatory hearing, and must comply with certain restrictions, which include house arrest, electronic monitoring, or day and/or evening reporting centers. Structured shelter is also used for cases where the youth cannot return home after arrest but otherwise represents a lower risk.
6. DJS formally authorizes the State’s Attorney to petition the juvenile court. The State’s Attorney then reviews the complaint, and may dismiss it, or file a petition to the juvenile court for an adjudicatory hearing.
7. At the adjudicatory hearing, the juvenile court determines the outcome of the petitioned charges, which can be sustained or not sustained.
8. While a youth is awaiting adjudication, disposition and/or supervision or placement, DJS conducts a series of assessments and investigations which will guide the DJS recommendation to the court on how the case should be handled.
9. For cases where the charges are sustained, a dispositional hearing is held to determine if the youth requires supervision by DJS under a probation order, or will be committed to DJS’ care which usually indicates an out-of-home placement.
10. For youth whose disposition is probation, DJS case managers provide supervision and services while the youth resides at home. Supervision intensity varies depending on the risk level of youth. Standard community supervision levels include low, moderate or high supervision intensity. The most intensive supervision is provided as part of the Violence Prevention Initiative (VPI), and includes three supervision levels (Levels I, II, and III).
11. Youth who are committed to the Department for out-of-home placement often continue to wait in detention “pending placement” for an appropriate placement to become available.
12. Youth who are committed to an out-of-home placement may be placed in a broad variety of programs (state-run or private, secure or non-secure) depending on the risk-level and treatment needs of the youth.
13. DJS has committed diversion programs for youth who might otherwise be placed out-of-home. These evidence-based in-home programs provide services and treatment to the youth and family, including Functional Family Therapy (FFT), Multisystemic Therapy (MST), and Multidimensional Treatment Foster Care - Adolescent (MTFC-A).
14. Youth returning home from a committed placement are supervised by DJS case managers. This supervision is at various intensity levels, and case managers also assist youth with school re-entry, employment, and other services.

Professional Training and Education Unit (PTEU)

The Professional Training and Education unit (PTEU) supports DJS and its employees through strategic processes and procedures that promote and support effective practices in juvenile justice. PTEU provides leadership and strategic direction for organizational development, which includes management of processes including strategic planning and a training continuum from Entry Level Training (ELT) through Executive Training.

An organization's backbone is the people and the talents they bring to the job. PTEU assists in the design of employee engagement strategies to motivate, manage, retain, and develop the DJS workforce to its fullest potential in alignment with the vision, mission, values, and goals of the Department.

The key to success for any organization is the ability to attract and retain skilled and talented people. Professional Training is the process of developing, training and keeping a workforce who accomplishes the goals of the organization by providing continuous learning opportunities to enhance the knowledge, skills, and abilities of all employees.

PTEU conducts ELT sessions as needed for newly hired employees. ELT must be completed within the first year of employment with the agency. PTEU also conducts four Supervisor Training sessions per year for those employees who have been promoted to supervisory positions. Supervisor training must be completed within one year of the promotion date.

PTEU assigns Regional Training Managers who coordinate the delivery of required annual in-service training and provide direct continuing training support for staff. The Regional Training Manager's responsibilities includes: ensuring 100% compliance with in-service training requirements for current staff within their purview; coordinating, in conjunction with facility or regional scheduler, an annual comprehensive in-service training program; ensuring that the training schedule meets the requirements of the Maryland Police and Correctional Training Commissions (MPCTC) regulations (minimum of 18 hours of in-service training); ensuring that the training schedule complies with DJS and national standards for juvenile justice training of 40 hours in-service training; tracking and ensuring accurate data-entry in the Skills Manager database for all staff within their purview; managing course registration and administration for the assigned facilities or regional offices. When necessary, the Regional Training Manager's provide technical guidance, advice, and instruction to new DJS staff; determines individual organizational needs for their region or facility; plans employee development strategies and interventions; correctly applies concepts learned in the classroom to field training operations; monitors the progress of trainees; makes recommendations for improvement; and ensures trainees are current on all qualifications.

DJS employees who provide direct care to youth under the Department's supervision are required by the MPCTC to be certified. PTEU is responsible for ensuring that all DJS employees complete their required annual training to maintain their certifications.

In-Service Training: PTEU has initiated the development of a comprehensive in-service training structure that will provide intermediate and advanced training in some content areas. Additionally, PTEU initiated the development of opportunities to engage technology in training through webinars, videoconferencing, and teleconferencing.

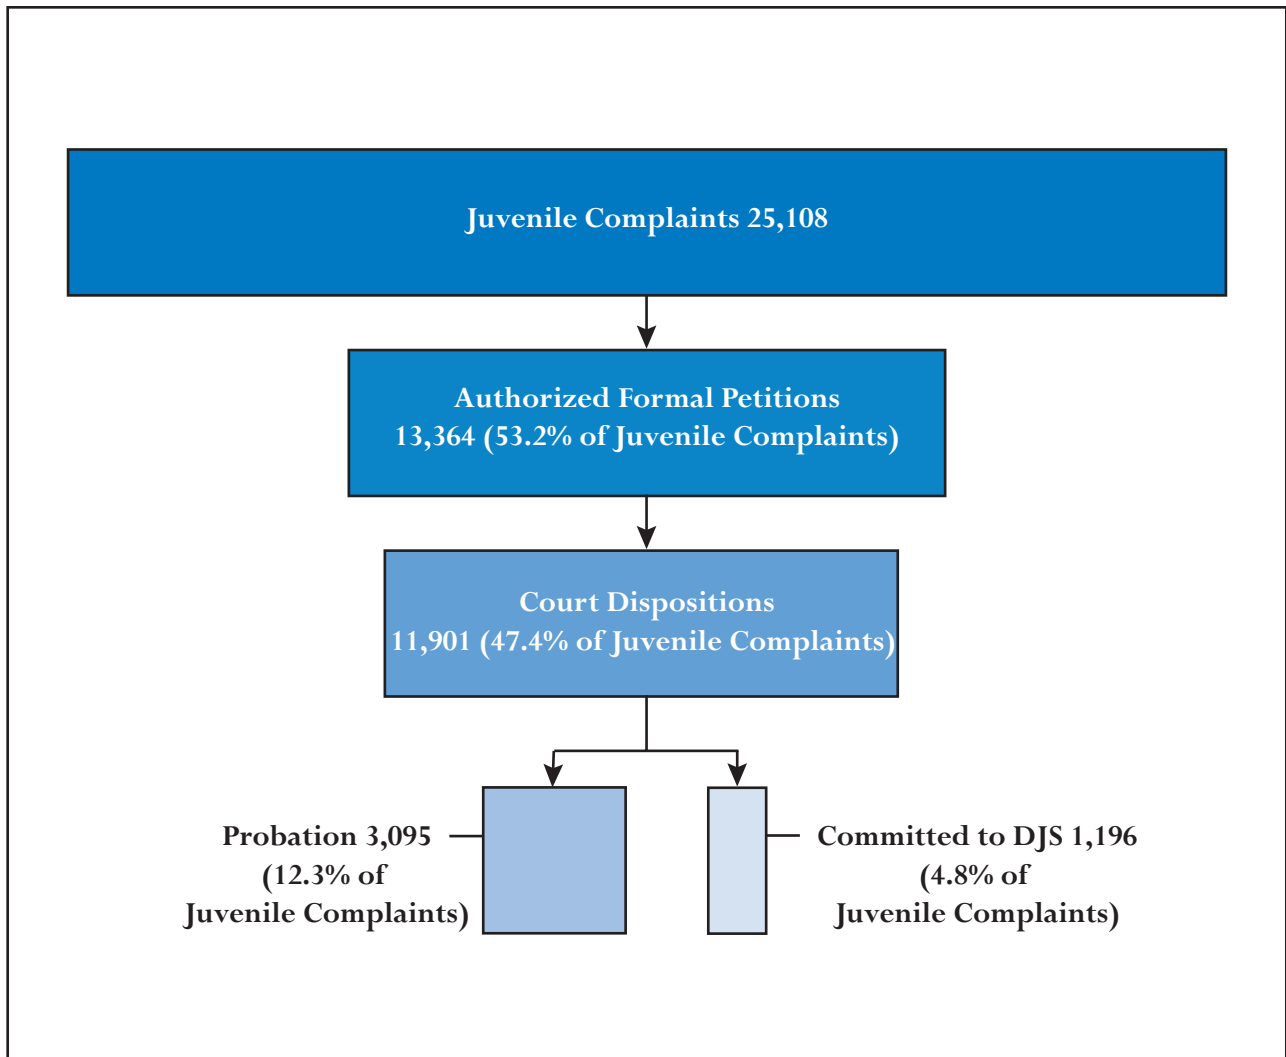

Brian Anderson instructing a course on Understanding the Juvenile Justice System

Specialized Training/Initiatives: PTEU has completed initial CHALLENGE Program training and continues to partner with outside organizations that develop training to meet the needs of staff.

Skills Manager Training Database: MPCTC requires all public safety agencies across the State to maintain all training data in the Skills Manager Training Database. Skills Manager is a robust system for collecting, managing, and reporting of records related to the development of DJS employees for the duration of their career. It monitors personnel training and certifications in many categories including ELT, in-service training, and instructor training. This training management system has a component entitled VISTA that will allow staff to provide employees with convenient access to their own professional development and training records.

Leadership Development Institute (LDI): DJS continues to evaluate the most effective methodology for the development of leadership. We still support and encourage participation in the MPCTC's Leadership Development Institute, which offers a variety of courses in management and leadership development.

Flow of FY 2014 Case Referrals

In FY 2014:

- There were a total of 25,108 juvenile complaints processed by DJS.
- 53.2% of those juvenile complaints were referred to the State's Attorney for the authorization of a formal petition (as opposed to being resolved at intake or juvenile receiving 90-days of pre-court supervision).
- Of the 13,364 juvenile complaints referred to the State's Attorney, 89.1% were petitioned and resulted in a court disposition. The remaining 10.9% includes 6.8% not petitioned (906), 3.5% denied by State's Attorney (475), and 0.6% initial petition withdrawn (82).
- Of the 11,901 court dispositions:
 - 26.0% received probation.
 - 10.0% were committed to DJS.
 - The remaining 64.0% were dismissed/closed, continued, transferred, nolle pros., pending disposition, jurisdiction waived, writ pending, inter-region/state, or other.

Section II: Intake and Community Supervision

Bridges at Worthmore customized a Teen Riding Program for DJS youth to meet their individual needs. The program was designed to improve the educational, physical, and emotional well-being of DJS youth in Kent County.

Introduction to Intake and Community Supervision

The DJS Operations Division - Community Services subdivision provides a continuum of services to youth across multiple stages of the juvenile justice system. The provision of community services begins at DJS intake where DJS intake officers receive complaints from persons or agencies – for example, private citizens, schools, victims, or law enforcement agencies – and assess whether the juvenile court has jurisdiction and whether judicial action is warranted. In addition to screening complaints received at intake, Community Services staff directly supervise youth placed on Informal (or Pre-Court) Supervision, Community Detention and Electronic Monitoring (CD/EM), Probation, Aftercare, and/or Violence Prevention Initiative (VPI) program supervision. Case supervision and management consists of a number of tasks which will be described in more detail below.

Juvenile Intake

DJS intake officers review all delinquent and Child in Need of Supervision (CINS) complaints, citations, referrals for service, and peace order requests. Intake officers are directed to make a determination within 25 days as to whether the juvenile court has jurisdiction, and whether judicial action is in the best interest of the public or the child. DJS intake officers are authorized to either: (a) disapprove a complaint as legally insufficient; (b) resolve the matter at intake; (c) propose an informal adjustment period (also called pre-court supervision); or (d) authorize the filing of a petition by the State's Attorney's Office.

The intake decision-making process may involve an interview with the youth, parent and/or guardian, and where applicable, the victim(s). The intake decision is also guided by the Maryland Comprehensive Assessment and Service Planning (MCASP) Intake Risk Screen (see Appendix I). The MCASP Intake Risk Screen is completed at intake for all alleged offenses except alcohol and tobacco citations and status offenses (e.g., curfew violations and runaway complaints). MCASP Intake Risk Screen items create a delinquency history score and a social history score. The instrument generates a recommended intake decision based on the intersection of these two scores and the nature of the most serious alleged offense (whether it is a felony or misdemeanor). If a youth is referred for a violent felony offense, the instrument recommends that the case be handled formally by authorizing the filing of a petition.

In addition to assessing the merit of complaints received at intake and making the case forwarding decision, DJS intake officers are responsible for determining whether juveniles who have been taken into custody require secure detention or may be released to a parent, guardian, or other responsible adult and, if so, under what conditions. Some youth are released to a caregiver without any additional restrictions or conditions. Other youth are released to a caregiver and required to participate in an alternative to detention (ATD) program such as CD/EM. Lastly, some youth are detained or placed in shelter care pending a court hearing which is held no later than the next court date.

Intake officers are directed by statute (Md. Code, Courts and Judicial Proceedings, section 3-8A-15) to authorize detention if detention is

deemed necessary to protect the youth or others, or if the youth is deemed likely to leave the jurisdiction of the court. Shelter care may be authorized for the same reasons as detention. Additionally, shelter care can be utilized if a parent, guardian, or custodian is not available to provide supervision and care until the child returns to court.

The decision to authorize detention is guided by a decision-making tool called the Detention Risk Assessment Instrument (DRAI). The DRAI is designed to provide an objective assessment of a youth's risk to the community as well as the probability that the youth will fail to appear for future court dates. The DRAI in use in FY 2014 was implemented in July 2013 (see Appendix F).

Intake services are provided by DJS regions during normal working hours (i.e., Mon-Fri., 8 a.m. to 5 p.m.). The Baltimore City Region provides 24/7 intake services and houses a centralized intake unit at the Baltimore City Juvenile Justice Center. The centralized intake unit handles all emergency intake services during non-traditional work hours and/or days for all regions across the state.

Community Supervision - Informal Adjustment (or Pre-Court Supervision)

As discussed above, one option for a case received at DJS intake is to handle the case informally without involving the juvenile court through an Informal Adjustment/Pre-Court Supervision period of up to 90 days. Pre-Court Supervision is an agreement executed by the DJS intake officer that stipulates conditions of the supervision period. The agreement requires consent by the youth, parent/guardian, and victim (where applicable). Agreements are tailored to the individual circumstances of the case and may include the payment of restitution, the completion of community service hours, as well as participation in specialized counseling or treatment programs such as substance abuse treatment. In some circumstances, the period of informal supervision may be extended to 180 days to allow for the completion of a substance abuse treatment program. Note that if a youth fails to meet the conditions of the agreement, the DJS intake officer may elect to forward the case to the State's Attorney's Office for review.

Community Supervision – Community Detention

DJS provides regional community detention and electronic monitoring services (CD/EM) typically for youth whose cases have been forwarded to the juvenile court at intake and are pending adjudication or disposition. The program operates as the primary state-run ATD, allowing youth to continue participating in community activities such as school or work, and helping maintain community ties and support systems. Note that CD/EM may also be ordered by the court as a condition of probation or aftercare supervision.

Community Detention supervision includes face-to-face and telephone contacts as well as random unannounced visits at home, school, and work. The level of supervision depends on the assessed supervision needs of each youth and the court-ordered release conditions. Community Detention officers are trained to detect violations of court-ordered release conditions and report any changes in a youth's home or school situation. Youth who violate the conditions of release may be withdrawn from the program and placed in secure detention.

The electronic monitoring component provides an additional layer of supervision. Compliance is monitored electronically through an ankle bracelet placed on the youth by a Community Detention officer. A transmitting unit is placed in the family home. A daily report is generated by the central computer and transmitted to an EM coordinator. This information is examined and any violations of the authorized schedule are transmitted for further consideration.

The CD/EM command center is located in Baltimore City. A centrally-operated command center is most efficient given the need for 24/7 staffing.

Community Supervision – Probation

Youth who are adjudicated and found delinquent by the juvenile court may be placed on probation under the supervision of a DJS case management specialist (CMS). Probation is the most frequently used juvenile court disposition. A probation term requires youth to abide by general supervision conditions, as well as any special conditions imposed by the court.

At the start of probation supervision (or in some instances, prior to disposition if ordered by the juvenile court), a Social History Investigation and report is completed by the assigned CMS. This report describes the social adjustment and circumstances of the youth and their family.

In addition, the CMS completes the MCASP Needs Assessment that includes components of the MCASP Intake Risk Screen completed at intake but provides a much broader and more comprehensive assessment of individual need. The MCASP Needs Assessment

categorizes youth as either low, moderate or high on each of the following criminogenic need domains (i.e., needs related to re-offending risk): (a) School; (b) Use of Free Time; (c) Employment; (d) Community Relationships; (e) Family; (f) Alcohol and Drugs; (g) Mental Health; (h) Attitudes and Aggression; and (i) Neighborhood Safety. (See Appendix J for a list of MCASP Needs Assessment items).

The CMS uses the social history and MCASP Needs Assessment data to develop recommendations to the juvenile court and to create the Treatment Service Plan (TSP). A TSP is completed for each youth under court ordered supervision. A TSP includes the recommended supervision level for the youth, specific goals for the youth and family to meet, and a statement of services to be provided to the youth and family. In developing the TSP, input from youth, parents and/or guardians, and service providers (as appropriate) is also solicited.

Community Supervision – Aftercare and Re-entry

Aftercare supervision is similar to probation supervision in that the CMS performs many of the same supervisory tasks and relies on the same tools for decision-making (e.g., the MCASP Needs Assessment). Aftercare services are provided for youth who have been committed to the custody of DJS for placement outside the home, or occasionally for the receipt of in-home services in some jurisdictions. A CMS is assigned to the case upon commitment; planning for aftercare starts before the youth is placed in a residential program.

Aftercare case management is comprehensive, beginning with assessments of the youth's progress while in residential placement to the provision of services intended to facilitate community reintegration upon release. Building on the services provided in the residential placement, the CMS is responsible for linking services for the youth and family, monitoring the youth's adjustment back to the community, and ensuring compliance with any court directive. The MCASP Needs Assessment provides guidance to case managers as they coordinate and plan for services.

A variety of programs is used to assist youth in the re-entry process, including independent living programs, transitional educational services, employment programs – such as, job readiness training, career exploration and vocational training – and, continued substance abuse and mental health treatment.

Community Supervision - Violence Prevention Initiative

The Violence Prevention Initiative (VPI) is an intensive supervision program intended to reduce the number of juvenile homicides and non-fatal shootings, both offending and victimization. The VPI program focuses on youth under supervision (either probation or aftercare) who are believed to be at high-risk of either violent offending or violent victimization. The program combines intensive surveillance

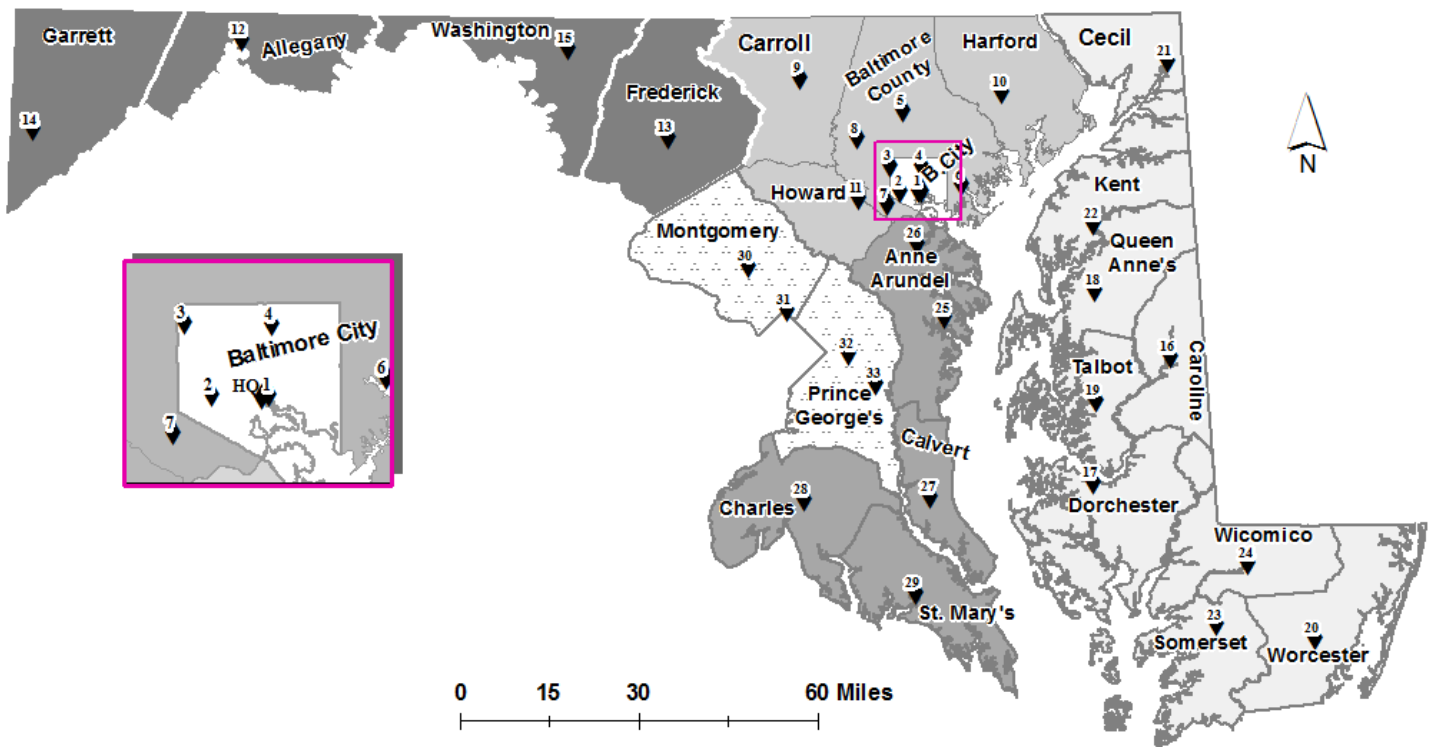

(e.g., frequent contact with youth during non-traditional hours such as evenings and weekends, and GPS monitoring) with enhanced service delivery (e.g., drug or mental health treatment). Youth are sanctioned swiftly upon evidence of non-compliance in order to ensure the earliest possible intervention.

Interstate Compact on Juveniles (ICJ)

The ICJ unit provides for the cooperative supervision of probation and aftercare youth moving from state to state and the return of runaways,

absconders, and escapees. In 2008, a new compact was enacted forming the Interstate Commission for Juveniles. Maryland and 40 other states are currently members. The ICJ governs each member state as to the provision of proper supervision or return of juveniles, delinquents, and status offenders on probation or aftercare who have absconded, escaped, or run away and in so doing have endangered their own safety or the safety of others. It is the responsibility of each member state to provide supervision and services to ICJ cases using the same standards that prevail for its own juveniles placed on probation or aftercare supervision.

- *U.S. Census and Maryland Department of Planning Estimation Data:*
 - Between July 2010 and July 2013, the juvenile population (ages 11-17) decreased 4.2% (from 141,751 to 135,756).
- *Complaint Source (FY 2014):*
 - 7.2% of intake complaints came from sources other than police.
- *Intake Case Forwarding Decisions (FY 2014):*
 - 56.1% of complaints were formaled while 14.0% were informaled.
- *Intake Trends (FY 2012-2014):*
 - Percent of committed dispositions decreased from 8.6% to 7.4%.
 - Percent of probation dispositions decreased from 31.7% to 29.3%.
- *Time Frames - Averages (FY 2014):*
 - Time from offense to intake referral date was 26.0 days.
 - Time from intake referral date to case forwarding decision was 18.5 days.
 - Time from case forwarding decision to delinquent adjudication was 95.9 days.
- *Racial and Ethnic Disparity (FY 2013):*
 - Since one region can include counties that are vastly different in terms of relative rate indices, presenting a regional rate would mask variations at the county level.
 - See Appendix N for a description of DMC Strategies and Appendix O for a complete presentation of relative rate indices.
- *Average Length of Stay (FY 2014):*
 - Pre-Dispositional Detention - 16.0 days versus 16.1 statewide
 - Pending Placement - 24.0 days versus 26.7 statewide
 - State-Operated Committed - 159.8 days versus 144.8 statewide

- *U.S. Census and Maryland Department of Planning Estimation Data:*
 - Between July 2010 and July 2013, the juvenile population (ages 11-17) decreased 7.5% (from 45,806 to 42,389).
- *Complaint Source (FY 2014):*
 - 15.3% of intake complaints came from sources other than police.
- *Intake Case Forwarding Decisions (FY 2014):*
 - 53.1% of complaints were formaled while 23.8% were informed.
- *Intake Trends (FY 2012-2014):*
 - Percent of committed dispositions increased from 5.6% to 5.8%.
 - Percent of probation dispositions increased from 23.6% to 24.2%.
- *Time Frames - Averages (FY 2014):*
 - Time from offense to intake referral date was 20.3 days.
 - Time from intake referral date to case forwarding decision was 16.4 days.
 - Time from case forwarding decision to delinquent adjudication was 65.0 days.
- *Racial and Ethnic Disparity (FY 2013):*
 - Since one region can include counties that are vastly different in terms of relative rate indices, presenting a regional rate would mask variations at the county level.
 - See Appendix N for a description of DMC Strategies and Appendix O for a complete presentation of relative rate indices.
- *Average Length of Stay (FY 2014):*
 - Pre-Dispositional Detention - 21.0 days versus 16.1 statewide
 - Pending Placement - 16.7 days versus 26.7 statewide
 - State-Operated Committed - 119.1 days versus 144.8 statewide

- *U.S. Census and Maryland Department of Planning Estimation Data:*
 - Between July 2010 and July 2013, the juvenile population (ages 11-17) increased less than 1% (from 173,186 to 174,769).
- *Complaint Source (FY 2014):*
 - 12.5% of intake complaints came from sources other than police.
- *Intake Case Forwarding Decisions (FY 2014):*
 - 48.7% of complaints were formaled while 19.8% were informaled.
- *Intake Trends (FY 2012-2014):*
 - Percent of committed dispositions increased from 10.0% to 13.7%.
 - Percent of probation dispositions decreased from 21.5% to 15.9%.
- *Time Frames - Averages (FY 2014):*
 - Time from offense to intake referral date was 62.2 days.
 - Time from intake referral date to case forwarding decision was 24.0 days.
 - Time from case forwarding decision to delinquent adjudication was 79.0 days.
- *Racial and Ethnic Disparity (FY 2013):*
 - Since one region can include counties that are vastly different in terms of relative rate indices, presenting a regional rate would mask variations at the county level.
 - See Appendix N for a description of DMC Strategies and Appendix O for a complete presentation of relative rate indices.
- *Average Length of Stay (FY 2014):*
 - Pre-Dispositional Detention - 22.1 days versus 16.1 statewide
 - Pending Placement - 32.3 days versus 26.7 statewide
 - State-Operated Committed - 148.9 days versus 144.8 statewide

Long-Term Trends

JUVENILE COMPLAINTS FY 2005-2014

- Juvenile complaints decreased 51.1% between FY 2005 and FY 2014 and 8.9% between FY 2013 and FY 2014.

JUVENILE COMPLAINTS BY SEX FY 2005-2014

- Juvenile complaints decreased for both sexes between FY 2005 and FY 2014 though the percent reduction was greater for males than females (52.9% for males and 45.6% for females).

JUVENILE COMPLAINTS BY RACE FY 2005-2014

- Between FY 2005 and FY 2014, juvenile complaints decreased for all races: Blacks (45.5%), Whites (61.3%), and youth of other races (30.0%).

Data Sources: FY 2005-2011 data from revised ASSIST run in October 2014; FY 2012 to 2014 data were run for this Guide. Updates made subsequent to data being run are not included.

Long-Term Trends (cont.)

PERCENT CHANGE IN JUVENILE COMPLAINTS BY COMPLAINT TYPE FY 2005-2014

- Between FY 2005 and FY 2014, there was an overall decrease in all complaint types. The largest decrease was in Non-Violent Felonies (67.7%).

PROPORTION OF JUVENILE COMPLAINTS BY COMPLAINT TYPE FY 2005-2014

- Although the proportion of juvenile complaints in each category remained relatively stable between FY 2005 and FY 2014, the proportion of Crimes of Violence and Misdemeanors increased and the proportion of Non-Violent Felonies and Other offenses decreased.

DJS CASE FORWARDING DECISIONS FY 2005-2014

- Authorized formal petitions have consistently comprised the highest number of case forwarding decisions. Between FY 2005 and FY 2014, authorized formal petitions decreased 38.8%, informals decreased 64.2%, and the number of cases being resolved or dismissed decreased 57.4%.

Data Sources: FY 2005-2011 data from revised ASSIST run in October 2014; FY 2012 to 2014 data were run for this Guide. Updates made subsequent to data being run are not included.

COURT DISPOSITIONS OF PETITIONED CASES FY 2005-2014

• Probation dispositions have consistently been higher than committed dispositions. Between FY 2005 and FY 2014, probation dispositions have decreased 38.4% and committed dispositions decreased 33.7%.

PERCENT CHANGE IN PRE-DISPOSITION DETENTION PLACEMENTS BY COMPLAINT TYPE FY 2005-2014

Note that the most recent offense preceding the detention placement may not be the reason for detention.

• Pre-disposition detention placements preceded by a Crime of Violence increased by 6.0%. Pre-disposition detention placements preceded by a Non-Violent Felony, Misdemeanor, or Other offense decreased by 59.3%, 15.4%, and 47.1% respectively.

PROPORTION OF PRE-DISPOSITION DETENTION PLACEMENTS BY COMPLAINT TYPE FY 2005-2014

• Between FY 2005 and FY 2014, the proportion of pre-dispositional detention placements for Non-Violent Felonies decreased from 32.5% to 18.3% and Misdemeanors increased from 42.5% to 49.7%.

Data for this table were updated from ASSIST, and may not match earlier published reports. Data represents only youth under juvenile court jurisdiction.

Long-Term Trends (cont.)

DETAINED AVERAGE DAILY POPULATION (ADP) FY 2005-2014

- Between FY 2005 and FY 2014, ADP for the total detained population decreased 30.6%. Pre-Disposition ADP has consistently been higher than ADP for Pending Placement and both groups saw a decrease between FY 2005 and FY 2014 (22.2% decrease for Pre-Disposition and 43.6% for Pending Placement).

COMMITTED RESIDENTIAL AVERAGE DAILY POPULATION (ADP) FY 2005-2014

- Between FY 2005 and FY 2014, ADP for the total committed population decreased 26.3%. ADP decreased 29.9% for Private In-State facilities and 30.5% for DJS-Operated facilities while ADP for Private Out-of-State facilities increased 33.3%.

Section III: Detention

Towson University Mentors and Pets on Wheels visit the youth at Charles H. Hickey Jr. School.

Introduction to Detention

The juvenile court may detain youth on a temporary basis in a physically restricting (or secure) facility pending court disposition. Detention may be ordered if it is determined that the youth presents a threat to him/herself or to the community. (See Introduction to Intake and Community Supervision for an overview of detention authorized by intake officers at the point of intake.) Maryland youth are detained in one of seven detention facilities operated by DJS across the State.

DETENTION ADMISSIONS

Each detention facility operates an admissions area (24 hours a day) where all youth admitted to detention are processed. An admissions officer interviews youth to collect and verify basic identifying information. The admissions officer also performs a search of the DJS information system, ASSIST, to obtain available information on a youth's delinquency and placement history. A photograph of each youth is taken and included in the case record for identification purposes. The rules of the detention facility, including the grievance procedure, are provided to each youth in the facility handbook. Youth are issued clothing to wear in the facility. Personal clothing is catalogued, packaged, and placed in secure storage.

The admissions process includes an initial health screening. It is performed by admissions nursing staff and consists of a review of physical health, mental health, and substance abuse needs. A full medical history and physical examination is conducted by a licensed physician or nurse practitioner within seven days of admission.

DETENTION CASE MANAGEMENT

Youth who are detained by the juvenile court are assigned a DJS community case manager and a facility case manager. The community

case manager is based in the local DJS office within the youth's home jurisdiction. To complete a social history investigation, the community case manager visits the youth in detention, interviews the youth and family, completes the Maryland Comprehensive Assessment and Service Planning (MCASP) Risk Screen and Needs Assessment (where applicable, post-adjudication), and provides recommendations to the juvenile court at disposition. The facility case manager acts as a liaison with the court, family, community case manager, and treatment services while the youth is in detention.

DETENTION SERVICES

MENTAL HEALTH AND SUBSTANCE ABUSE SCREENING AND ASSESSMENT

DJS Behavioral Health Services provides mental health screening, assessment, and treatment services at all DJS detention facilities. Services may include suicide prevention, crisis intervention and stabilization, and medical evaluation and monitoring.

Upon admission, each youth is screened by a qualified mental health professional. The screening consists of an interview, the administration of tests as appropriate, and the review of any prior assessments or records (e.g., psychosocial or clinical assessments). If the initial mental

health screen reveals symptoms of mental health issues, recommendations regarding the need for further services and/or the need for a more in-depth assessment are made. In-depth assessments are conducted by psychiatrists or licensed psychologists and provide an examination of emotional functioning, adaptive functioning, and cognitive functioning as well as recommendations for treatment.

Certified addictions counselors screen and assess youth in detention and determine appropriate levels of substance abuse treatment needed by youth. This information assists case managers in linking youth with appropriate community and residential services. Addictions counselors work closely

with the Department’s medical director for those youth requiring medication management as a result of their drug addiction.

EDUCATIONAL SERVICES

The Maryland State Department of Education’s (MSDE) Juvenile Services Education Program (JSE) provides educational programming to youth in DJS detention facilities consistent with the requirements of Code of Maryland Regulations (COMAR), Title 13A. The program includes instruction in Core Content subjects, Career and Technology Education, library/media services, life skills, and special education services. MSDE assumed educational programming for the final remaining DJS residential detention facilities including Thomas J.S. Waxter Children’s Center and Alfred D. Noyes Center in FY 2013.

Students are pre-tested upon entry to the JSE program to assess baseline academic skills. Teachers use the results to design learning plans for each student that form the basis of daily instruction. After each 30-day period of enrollment, the student is post-tested to determine academic gains. Students in a JSE program can earn credit toward the Maryland High School Diploma that they may receive upon return to their home high school. Alternately, some students are enrolled in classes designed to prepare them to take their GED examination.

RECREATIONAL ACTIVITIES

A structured recreation program is available to many youth in detention. The recreation program provides a variety of activities promoting physical and mental health. Youth participate in recreational activities for a minimum of one hour per day (two hours per day of recreational activity is encouraged).

Pending Placement (Post-Disposition)

Youth who have been committed to the custody of the Department for residential placement may be placed in detention on a temporary basis by the juvenile court. Youth detained post-disposition are considered to be pending placement. That is, they are waiting to be admitted or placed in one of many possible out-of-home treatment programs. Some programs are considered to be community-based (for example, foster care, treatment foster care, group homes, or therapeutic group homes). Other programs are not community-based (for example, in-patient substance abuse treatment, DJS-operated Youth Center, or Residential Treatment Center). Some youth may require placement into a secure facility. Secure placement options include the Victor Cullen Center (for males) and the J. DeWeese Carter Youth Center (for females) in Maryland or an out-of-state program contracted by DJS.

A review hearing is held in accordance with Md. Code and Judicial Proceedings, 3-8A-15(k) for any youth in detention 25 days after the court has made a disposition. At the hearing, DJS is required to

Youth at Baltimore City Juvenile Justice Center participated in the annual University of Baltimore Community Service Day creating the Greener Baltimore Mural.

explain the reasons for continued detention. The court will continue to conduct a hearing every 25 days thereafter until a youth has been placed.

Youth who are pending placement receive the same core services as youth detained pre-dispositionally, including educational services, screening, evaluation, and treatment for substance abuse, mental health, and somatic health (including dietary and dental).

Youth receive bi-weekly visits from their community case manager. Each facility also allows family visitation during the week or on weekends (the visitation schedule varies by facility).

During the pending placement period, the community case manager maintains contact with the youth’s family. The community case manager is also responsible for reporting to the juvenile court regarding the youth’s placement status.

In addition to court review, pending placement cases are reviewed by the Department on a weekly basis at facility management meetings. Regional-level meetings are held on a monthly basis to review placement statistics and identify barriers to placement and ways to expedite the process.

Pending Placement (Post-Ejection from a Committed Program)

Youth ejected from a committed program, who require a new committed placement, and do not require a new court hearing due to a new offense may be placed in detention.

Some youth committed to the custody of the Department and placed in a residential program may not successfully complete the designated program. Some youth run away from their placement or are ejected due to misbehavior. For other youth, additional needs may become evident during the course of the program, thereby necessitating a different type of program.

In this event, youth may subsequently be placed in a detention facility. While in pending placement, the Department re-evaluates the youth's case and works to secure acceptance to the most appropriate, alternative program. While these youth have not committed a new

offense and will therefore not require a new court hearing, they are entitled to a court review hearing every 25 days while detained on pending placement status.

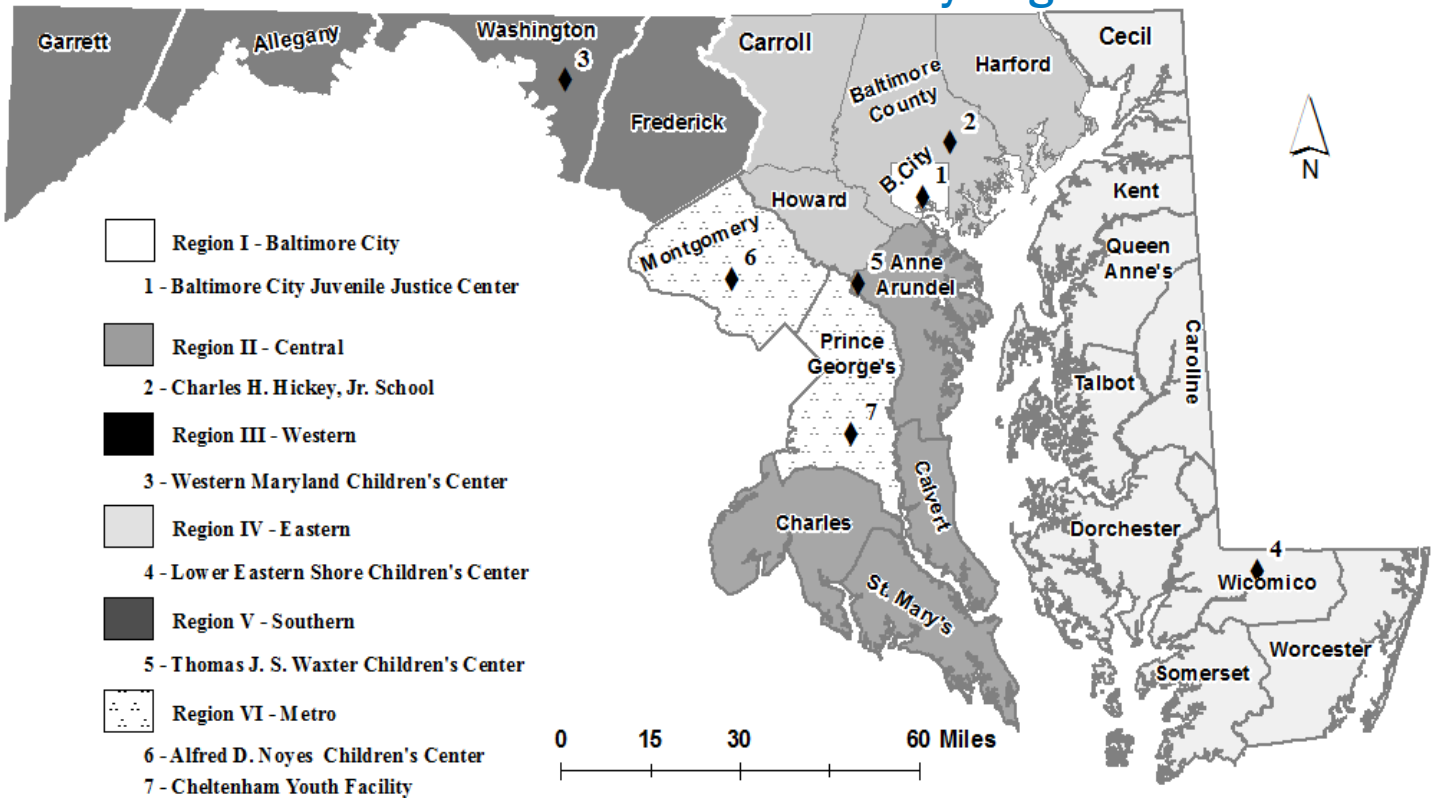

Note that effective June 1, 2012, the Department was authorized to transfer youth directly from one facility or program to another facility or program (of equal or higher security level) without first asking the court to modify the commitment order by means of a court review hearing. The Department expects that this legislative change will help reduce the pending placement population.

A Note to Readers:

It is strongly recommended that readers review the following distinction as it will assist in understanding data presented in this section:

Placements versus Admissions: A placement is based on a decision made by an intake officer or judge to place a youth into detention. An admission occurs when a youth physically enters a facility either through direct placement or through transfer. Therefore, during one placement, a youth may have several admissions and these counts will not match.

DJS Secure Detention Facilities by Region

Total Statewide Activity for Detention Centers

Total Capacity: 454 beds

DJS owns and operates seven detention facilities across the state. Each facility houses a population of juveniles awaiting disposition (Pre-D) and also houses juveniles who are post-disposition (Post-D) awaiting placement in a committed program. The ejection population represents youth returned to detention following ejection from a committed residential program. It does not include youth with new offenses that require new court processing, and only includes youth now waiting for a new committed placement. Statewide information includes J. DeWeese Carter Center for FY 2012.

Under Age 13 Statewide Activity for Detention Centers

Youth under 13 who are detained by the court represent very few of the youth detained by DJS. Rather than placing these youth in a detention facility, DJS most frequently uses an alternative to detention (ATD) with placement at home or in a shelter. However, if a youth must be in a detention center they are housed with youth closest in age and size. If deemed highly vulnerable they may be placed in the infirmary, with one-on-one staff supervision or sent to a smaller facility with a lower population. Wherever placed, youth under 13 receive all the same services that other detained youth receive.

Youth Detained Pending Adult Criminal Charges

Generally, youth ages 17 and under who are alleged to have committed a delinquent act and are determined to require secure detention are held in juvenile detention facilities. However, youth ages 17 and under may be held in pre-trial adult detention facilities if the youth is alleged to have committed a criminal act that is excluded from the jurisdiction of the juvenile court.

Youth charged as adults who are ordered into pre-trial detention by the Court, are held in adult detention facilities. Maryland law, however, provides an avenue for the adult court to order a youth to be held in a juvenile detention facility if the youth is eligible for a transfer of jurisdiction (Md. Code, Criminal Procedure, §4-202). Youth charged as adults and ordered by the court to be held in juvenile detention may remain there pending a transfer hearing to determine if jurisdiction should remain in the adult court or be transferred to the juvenile court. Data in this section reflects those youth held in DJS detention facilities for the adult court pending a transfer hearing.

In July 2013, an agreement was reached between the Department of Juvenile Services, The Department of Public Safety and Correctional Services (DPSCS), the Circuit Court for Baltimore City, the Baltimore City State's Attorney, and the Public Defender regarding youth

charged as adults in Baltimore City. Specifically, the parties mutually agreed that all youth charged as adults who are eligible for a transfer to the juvenile system will be housed in the Baltimore City Juvenile Justice Center (BCJJC) while they wait for their transfer hearing. BCJJC is the DJS-operated juvenile detention facility for males in the City. Previously, this population resided at the Baltimore City Detention Center, which is the adult facility operated by DPSCS. This agreement complies with existing law.

Alternatives to Detention (ATD)

DJS has a variety of programs designed to safely supervise youth in the community as an alternative to secure detention pending adjudication. ATDs include Community Detention (CD) - with the possibility of electronic/GPS monitoring (EM), and Day & Evening Reporting Centers (ERC). DJS also collaborates with private providers in Baltimore City and Montgomery County to utilize additional alternative programs, such as the Pre-Adjudication Coordination and Transition Center (PACT) and the Detention Reduction Advocacy Program (DRAP) for Baltimore City youth, and the Montgomery County Community Collaboration Council to oversee the provision of ERC Services. ATD programs are used either by DJS intake staff for medium risk youth presented for detention (placements must be reviewed by the juvenile court the next court day) or by the juvenile court directly. These alternatives allow youth to continue with school or work and maintain community ties, support systems, or alternative care. In addition, youth on ATD supervision are expected to appear for scheduled hearings and not have any new arrests.

Section IV: Committed Programs

For the first time, DJS video-conferenced youth from every state-operated facility to be part of a dialogue with award winning actor and author Hill Harper, who spoke at Victor Cullen Center. Harper challenged the youth to become architects of their own lives.

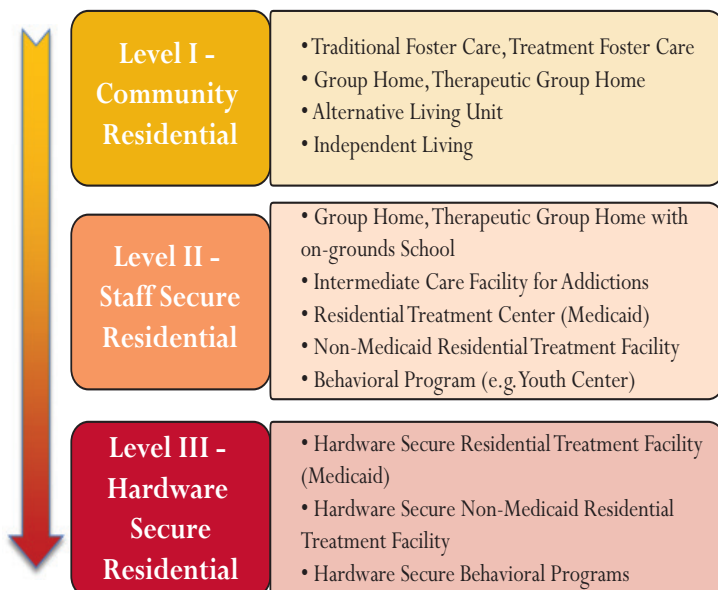

Introduction to Committed Programs

The DJS Division of Operations is responsible for selecting the most appropriate out-of-home placement for youth who have been committed to the custody of DJS by the juvenile court. Program placements vary based on the treatment services provided as well as by security level. The full range of DJS placement options include: (a) Foster Care Homes (traditional and treatment foster care); (b) Group Homes (general service, and therapeutic); (c) Independent Living Programs/Alternative Living Units (often used as a step-down from a more restrictive program placement); (d) Residential Treatment Centers (RTCs) and non-Medicaid residential treatment facilities (out-of-state); (e) Intermediate Care Centers for Addictions (ICFAs); (f) Behavioral Programs e.g. DJS-operated Youth Centers (including the Green Ridge Mountain Quest program) and out-of-state programs in a staff secure setting; and (g) Treatment Programs in a hardware secure setting (both DJS-operated and privately contracted out-of-state).

DJS has established three levels of residential program placements based largely on the level of program restrictiveness (see Figure below). Level I includes all programs where youth reside in a community setting and attend community schools. Level II includes programs where educational programming is provided on-grounds and youth movement and freedom is restricted primarily by staff monitoring and supervision. Level III programs provide the highest level of security by augmenting staff supervision with physical attributes of the facility, i.e., locks, bars and fences.

PLACEMENT PROCESS

The DJS placement process is designed to select the most appropriate program and treatment services for committed youth. The process begins with a comprehensive assessment of each youth. A staffing

meeting is then held to bring together key staff members responsible for resource and treatment service planning. Principal participants include the youth's case manager, case manager supervisor, and resource coordinator as well as parents and/or guardians who are invited to participate.

At the staffing meeting, all pertinent information collected as part of the assessment is reviewed, including the current offense, delinquency history, social history, MCASP recommended supervision level, MCASP assessment of need, educational records, clinical assessments, and the involvement of any other state agency. The staffing meeting culminates with recommendations for program participation and/or treatment services tailored to the circumstances of each youth. DJS then refers the youth's case to the recommended programs for consideration. Programs may either accept or reject an applicant based on program eligibility criteria and capacity. Upon acceptance, program services are authorized by DJS prior to placement in the program.

DJS contracts with private in-state as well as out-of-state vendors to provide services to committed youth. A Certificate of Placement (COP) database is used to manage the referral and placement of youth with private providers. The database facilitates the placement process, for example, by automatically pulling staffing information from the DJS information system (ASSIST), creating program referral letters, and tracking acceptances and rejections from potential programs.

Multidisciplinary Assessment Staffing Team (MAST): DJS has augmented the placement process for cases at risk of being committed to out-of-home placement by creating a specialized diagnostic team responsible for assessing youth, who are detained and at risk of placement, prior to court disposition. The process has been in place statewide since December 2013. The diagnostic

team includes a psychologist, social worker, community case manager, detention facility case manager supervisor, resource specialist, Maryland State Department of Education (MSDE) representative, and other disciplines as needed. Youth who require more specialized assessments (e.g., a neurological, psycho-sexual, or medical assessment) are referred for evaluation. Following this in-depth review, the team submits a report for the juvenile court to consider at disposition, including security and treatment recommendations.

The Continuum of Care and Central Review Committee (CRC): On occasion, the initial committed program placement may not be successful. Some youth run away from their placement or are ejected due to misbehavior. The behavioral, emotional, and/or medical needs of youth may also change. Continuum of Care legislation passed during the 2012 Legislative Session was implemented by the Department in July 2012. The legislation authorizes the Department to transfer youth directly from one facility or program to another facility or program (of equal or higher security level) without first requesting the court to modify the commitment order. The flexibility to move youth from one program to another is expected to reduce the need for secure detention as youth will no longer be detained pending court review and the subsequent placement decision-making process. This legislation is a key component of a larger reform effort to improve the assessment of youth, create a continuum of care, and establish length of stay guidelines. To manage this process, the Department established the CRC chaired by the Director of Behavioral Health. The CRC conducts weekly case reviews of youth at risk of removal from a committed residential placement; directs changes in the provision of services; and makes placement transfer decisions.

CHALLENGE Program: DJS operates seven committed facilities in Maryland (see table on pg. 123). The CHALLENGE program, was implemented in all of these facilities by October, 2012. CHALLENGE provides youth with clear behavioral expectations within a structured daily routine using positive reinforcers. The program is grounded in the principles of positive reinforcement and modeling and is designed to encourage youth to accept responsibility for their behavior and learn problem-solving and leadership skills. Staff members are trained to teach and model problem-solving and social skills. CHALLENGE facilitates order and security within the facility and promotes an environment characterized by respect and fairness that is conducive to treatment.

EDUCATIONAL SERVICES

Educational services are provided to youth by MSDE certified teachers while in placement. Educational programs seek to maximize their academic achievement as well as the probability that each youth will earn a high school diploma via the earning

of credits or passage of the GED. The DJS school curriculum is currently based on the Maryland State Core Learning Goals which are being revised to reflect the National Education Standards. The curriculum includes grade level instruction in English, Social Studies, Mathematics, and Science. Middle school coursework and remediation for high school students is also offered in reading, written language, and math as appropriate. In addition to academics, the educational programs provide opportunities for each youth to develop career and technology skills. Eligible youth participate in mandated Maryland School Assessments (MSA) and High School Assessments (HSA). Required services are provided to special education youth per their Individualized Education Programs (IEP).

MSDE/Juvenile Services Education (JSE) seeks to collaborate with Local Education Agencies (LEA) as well as non-public and out-of-state schools. MSDE staff at each detention facility help facilitate appropriate instruction to youth in credit-bearing coursework as identified by each LEA through the record transfer process; and facilitate the successful transition of each youth as they return to their respective communities to the local public school or other appropriate educational program. DJS has a School Transition and Reentry Unit comprised of case management staff who assist local case managers as committed youth transition from in-state and out-of-state programs back to community resources.

Community-based private programs serving committed youth achieve appropriate educational programming by sending students to the local public school. Non-public programs in- and out-of-state offer similar services to our students as those provided by the Department and the MSDE/JSE Program; those in the state of Maryland must be approved to operate through the monitoring process of the MSDE Non-Public Approval Branch.

MSDE/JSE provides educational programming to youth at Victor Cullen and J. DeWeese Carter Center. Consistent with the requirements of Code of Maryland Regulations (COMAR), Title 13A, the program includes instruction in core content subjects, career and technology education (CTE), library/media services, life skills, and special education services. In FY 2013, MSDE assumed responsibility for educational programming of the William Donald Schaefer House and the Youth Centers. Students are pre-tested upon entry to the JSE education program to assess baseline academic skills. Teachers use the results to design learning plans for each student which form the basis of daily instruction. After each 60-day period of enrollment, the student is post-tested to determine academic gains. Students in a JSE program can earn credit toward their Maryland High School Diploma that they may receive upon return to their home high school. Alternately, some students are enrolled in advanced studies classes designed to prepare them to successfully obtain their diploma by examination using the GED tests. Students completing CTE course work receive appropriate industry certifications.

BEHAVIORAL HEALTH SERVICES

Mental Health Services in Facilities: DJS Behavioral Health Services provides mental health screening, assessment, and treatment services at departmental detention and long-term treatment facilities and provides oversight of contracted vendors providing these services. Services include: suicide prevention; crisis intervention and stabilization; medication evaluation and monitoring; brief individual, group, and family therapy; and crisis counseling. As members of the facility team, behavioral health staff and contractors provide support, technical assistance, and education services to the other members of the team on topics related to mental health concerns and medication. In the detention centers, psychiatrists, social workers, and psychologists provide evaluations in order to assist the case management staff in identifying appropriate residential placements or community-based services. These decisions are based on the needs of the youth with public safety in mind.

Mental Health Services in the Community: Mental health treatment services received by youth on probation and aftercare are provided by local community providers. DJS Behavioral Health Services does have licensed social workers and licensed professional counselors as members of the regional resource staff and on the MAST teams to provide consultation and assistance to the DJS community staff. The behavioral health clinicians conduct psychosocial assessments for youth who are likely to be placed out-of-home and they also complete Determination of Need certificates for youth who will be placed in community-based placements including foster care, therapeutic foster care, group homes, and independent living. Behavioral health clinicians provide a link with the local mental health Core Service Agencies (the local mental health authority) to ensure that appropriate community and residential services are available to DJS youth.

Substance Abuse Services in Facilities: DJS Behavioral Health Services provides screening, assessment, and treatment services to youth with substance abuse problems in each of the seven facilities. Certified addiction counselors screen and assess youth in detention and determine appropriate levels of substance abuse treatment needed by youth. These assessments assist case managers in linking youth with appropriate community and residential services. Counselors work closely with the Department's medical director for those youth requiring medication management as a result of their drug addiction. Each facility, with the exception of J. DeWeese Carter Center and Victor Cullen, has a substance abuse treatment component certified by the Maryland Department of Health and Mental Hygiene (DHMH), Office of Health Care Quality (OHCQ) under the authority of the Alcohol and Drug Abuse Administration (ADAA). All DJS committed facilities offer *Seven Challenges* substance abuse treatment, an evidence-based program implemented in 2009. A description of the services provided by each DJS facility is provided below:

- Backbone Mountain Youth Center: Early intervention, outpatient, and intensive outpatient levels of treatment (Certified)
- Green Ridge Youth Center: Early intervention, outpatient, and intensive outpatient levels of treatment (Certified)
- J. DeWeese Carter Center: Early intervention and outpatient levels of treatment (Not Certified)
- Meadow Mountain Youth Center: Intensive outpatient level of treatment (Certified)
- Savage Mountain Youth Center: Early intervention and outpatient levels of treatment (Certified)
- Victor Cullen Center: Early intervention, outpatient, and intensive outpatient levels of treatment (Not Certified)
- William Donald Schaefer House: Long-term (4 months), residential, medium intensity program (Certified)

Substance Abuse Services in the Community: The majority of substance abuse services received by youth on probation and aftercare are provided by local community providers. DJS provides linkages to these services through Drug Court and regular probation services. DJS Behavioral Health does provide funding for some of these services, however, the majority of funding comes through the DHMH/ADAA.

In Baltimore County, DJS Behavioral Health does provide substance abuse assessment services at several local offices that assist case managers and the Resource staff in identifying appropriate community and residential services for youth with substance abuse and addiction problems.

Behavioral Health and Victim Services: The Director of Behavioral Health and Victim Services has responsibility for

establishing and implementing policies governing the delivery of mental health, substance abuse, evidenced-based and victim services, and for hiring licensed, certified staff and contractors. In addition, the Director is responsible for working with other state agencies, including DHMH and the Governor's Office for Children (GOC), to ensure that DJS youth have access to services governed by and/or funded by these agencies. Finally, the Department's headquarters staff provide technical assistance as well as direct intervention to resolve interagency issues for the benefit of DJS youth.

DJS offers assistance, support, and information to all victims of juvenile crime. DJS understands that the judicial process can seem overwhelming and complicated at times. DJS helps victims proceed through the judicial system by providing information and understanding of the juvenile court system, assuring that victims are informed and aware of the rights afforded them under Maryland law, and advocating for their rights. DJS provides assistance with the preparation of victim impact statements and the enforcement of court orders for restitution via the restitution collection process. DJS also informs victims on how to initiate civil action on delinquent restitution accounts.

Referral to appropriate services is also available for all victims of juvenile crime who request assistance. Services may include, but are not limited to, referral for crisis intervention, emergency services, information regarding financial assistance, and information on case status and outcomes. DJS is committed to ensuring that all victims of juvenile crime are treated with dignity, respect, and sensitivity throughout the juvenile justice process.

SOMATIC HEALTH

The Division of Somatic Health Services provides comprehensive, quality health care and nutritional services to youth residing at DJS residential facilities. Its mission is to protect, promote, and advance the health of all youth in the care of the Department. Medical, dental, and dietary services are provided in an inter-

disciplinary fashion that is developmentally appropriate for youth, and are delivered in accordance with standards set forth by the National Commission on Correctional Health Care, the American Academy of Pediatrics, The Centers for Disease Control, and the Food and Nutrition Board of the National Academy of Science.

Youth admitted to DJS residential facilities require on-going, routine preventative health care similar to other children their age. In addition, they may have unmet or chronic health care needs upon admission, or may develop an acute health condition that needs to be addressed. DJS ensures that each program has licensed nurses, physicians, dietitians, dental providers, and laboratory and pharmacy services to meet the health care needs of the youth. For specialty, surgical, emergency, or in-patient care that may be required, youth are transported to community providers as needed.

Each youth must have a current nursing assessment, history and physical examination, vision screening, and dental examination upon or soon after admission, as well as screening for tuberculosis, anemia, and sexually transmitted infections. Girls are provided comprehensive gynecological care either on-site or in the community in order to meet individual needs. Vaccine records are requested on all youth, and DJS makes every effort to fully immunize youth who are not up to date on recommended and required vaccinations. Youth are seen at regularly scheduled clinic times and as needed for "sick call" requests. In addition, they are seen at least monthly by nursing staff to check on their overall health status and weight.

In order to prepare youth for success upon re-entry into the community, nurses and other DJS staff provide youth with individual and/or group health education and coordinate discharge planning to ensure that youth have their medications or required follow-up medical appointments with community providers.

DJS YOUTH CENTERS - CAREER & TECHNOLOGY AND THE GARRETT COLLEGE PROGRAMS

Youth Career and Technology programming at the DJS Youth Centers includes traditional building trades and aquaculture (an innovative green employment opportunity in Maryland). The Youth Centers developed an Aquaculture Technician Certificate that outlines necessary employment competencies and drives instruction. The aquaculture program is offered at the Meadow Mountain Youth Center. Successful youth earn an Aquaculture Technician I certificate. The other three Youth Centers also offer vocational programming on-site. Green Ridge and Backbone Mountain Youth Centers offer a 60-hour carpentry program. Students earn a certificate to document successful completion of the carpentry program and achievement of the program's competencies.

At Backbone Mountain Youth Center, there is an innovative program that provides students with the unique opportunity to be simultaneously enrolled in high school classes and introductory college courses through Garrett College of Maryland. Students are screened through a referral, record review, and interview process for acceptance

into the program. The Garrett College initiative has been operational since September 2006.

The Career and Technology programming has two goals for the youth – high school completion and job skill development. All students have opportunities to participate in multiple community projects in order to put into practice the skills learned in the classroom.

CLASSIFICATION

All DJS-operated facilities utilize an objective internal classification system to assess a youth’s potential vulnerability and supervision needs. The results of the classification assessment are used to guide appropriate housing decisions and room assignments. The classification assessment is implemented for all youth upon admission to the facility, and allows for reclassification in response to circumstances or special needs that may require modification of housing or room assignment.

The Housing Classification Assessment considers the following factors when making housing and room assignments: (a) the severity of the current charge or adjudication; (b) the severity of the most serious prior adjudication; (c) the number of prior serious incidents in custody

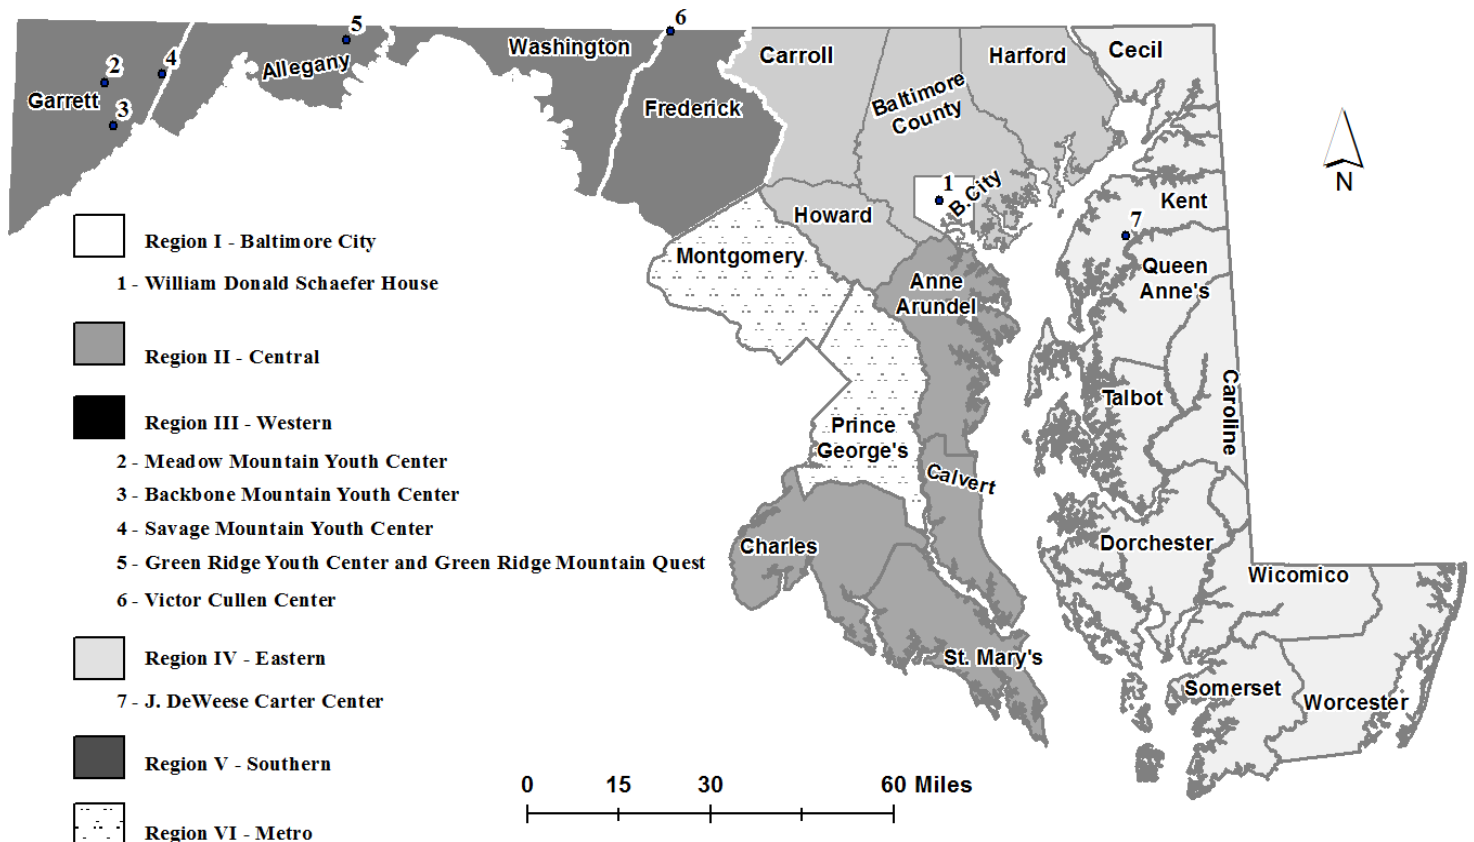

A Note to Readers:

It is strongly recommended that readers review the following distinction as it will assist in understanding data presented in this section:

Placement versus Admission: A placement is based on a decision made by the Department or a judge to place a youth into a committed program. An admission occurs when a youth physically enters a facility either through direct placement or through transfer. Therefore, during one placement, a youth may have several admissions and these counts will not match.

(youth-on-youth or youth-on-staff assaults, group disturbances, restraints, and escapes or attempted escapes); (d) age, size, and offense history of youth, especially when assigning two or more youth to a room; and (e) special needs including suicide risk, mental health, or other concerns that may merit higher or special supervision.

DJS State-Operated Committed Programs by Region

Statewide Total

At disposition, the juvenile court may commit a youth to the care of DJS. Legal custody of the youth is thereby transferred to the Department. A range of out-of-home program options (or placements) have been developed for committed youth. Community-based program options include placement in a foster home, group home, or independent living program. Placements in non-community settings include Intermediate Care Facilities for Addictions (ICFA), Residential Treatment Centers (RTC), DJS-operated Youth Centers, and secure confinement facilities. DJS operates seven facilities in Maryland and contracts with others both in-state and out-of-state.

Note: Though Community-Based Family Therapy Programs are presented within this section (pages 164-165), these data are not included on the statewide tables as these programs are not solely for committed youth. Data on the statewide pages only include youth in committed placements.

Statewide Females Only

Female youth represent approximately 17% of the population of youth committed to the care of the Department. Generally, girls are less likely than boys to be committed by the court for the commission of a felony offense and are more likely to report physical abuse, sexual abuse, and higher levels of family dysfunction. With the exception of staff secure behavioral facilities such as the DJS-operated Youth Centers, the same continuum of placement options is available to both girls and boys. Community-based program options include placement in a foster home, group home, or independent living program. Placements in non-community settings include Intermediate Care Facilities for Addictions (ICFA), Residential Treatment Centers (RTC), and the J. DeWeese Carter Center (a hardware secure, DJS-operated facility for girls). Out-of-state contracted programs are also available, however, girls are most likely to be placed in a group home or RTC. Placement in an out-of-state program is uncommon.

Statewide Under Age 13 Only

Youth who are under 13 and committed to the care of DJS may be placed in a range of residential facilities. State owned and operated committed facilities are designed for youth age 13 years and older. Because of the needs of youth under age 13, they are most frequently placed in treatment foster care, group homes, therapeutic group homes, diagnostic units, or Residential Treatment Centers. Wherever placed, youth under age 13 receive all the same services that other committed youth receive.

Foster Care

Traditional Foster Care is continuous 24-hour care and supportive services provided to a youth in a DJS-approved family home. The foster family serves low-risk youth who cannot be managed in their own homes. Youth served may be experiencing behavioral problems and need a respite from family/neighborhood issues. Foster Care also serves youth who need long-term placement, primarily because homes may not be appropriate for youth to return. Treatment Foster Care (TFC) is continuous 24-hour care and intensive support services operated by a licensed child placement agency or local Department of Social Services in a family setting for children with serious emotional, behavioral, medical, and/or psychological conditions. The behaviors of the youth served are not so severe that removal from the community is necessary.

Group Homes

General group homes are non-profit residential programs for youth in out-of-home placement licensed by DHR, DJS, or the Mental Hygiene Administration (MHA), part of DHMH. They provide out-of-home care for four or more youth who are moderate- to high-risk, and need more structure and supervision than a relative, foster parent, or treatment foster parent could offer. General group homes also provide a formal program of basic care, social work, and health care services. Therapeutic group homes (TGH) are residential programs for youth in out-of-home care that are licensed by MHA and must be non-profit organizations. TGHs provide access to a range of diagnostic and therapeutic mental health services to youth who are moderate- to high-risk and have an emotional or developmental disability. Those TGHs that provide educational programs on their grounds are considered to be staff secure programs.

Independent Living Programs (Including Alternative Living Units and Respite Care)

Independent Living Programs are implemented by a child placement agency licensed by DHR for youth 15 to 21 years of age who need to become self-sufficient and learn responsible living skills as they are unlikely to return home. Youth reside in either group homes or supervised apartment units, and must be enrolled in high school, college, vocational training, or be gainfully employed. During the program, youth learn about interpersonal skills, money management, job readiness, conflict management, positive leisure opportunities and communication skills. Alternative Living Units are residences owned, leased, or operated by a licensee that: (a) provides residential services for children who, because of a developmental disability, require specialized living arrangements; (b) admits not more than three children; and (c) provides 24 hours of supervision per unit, per day.

Intermediate Care Facilities for Addictions (ICFAs)

An ICFA is the most intensive level for residential substance abuse services, providing drug and alcohol abuse assessment, treatment, and/or education for moderate- to high-risk youth. Youth served may have problems in other aspects of their lives, i.e., mental health, school, family, peer group, and/or community. These programs are intense, closed programs able to serve not only substance abusing youth, but also dually diagnosed youth, that is, youth who have both a psychiatric diagnosis and an assessed substance abuse problem. These programs are intended to stabilize youth, initiate drug treatment and/or counseling services, and develop recommendations for services upon discharge.

Residential Treatment Centers (Includes Psychiatric Hospitals & Diagnostic Units/CEUs)

Residential Treatment Centers (RTCs) provide more intensive psychiatric and psychological treatment services. They are required to have psychiatrists, psychologists, and psychiatric nurses on staff to lead treatment. Maryland RTCs are approved for operation through the State Certificate of Need (CON) process and are licensed through the Mental Health Administration. Some RTCs concentrate on specific populations of youth. For example, locked RTCs focus on youth with behavioral problems and/or who are considered to be potentially harmful to self or others. The RTCs are intended to stabilize the youth's emotional condition; to provide services that increase the youth's ability to manage his/her mental illness as a potentially life-long challenge; to help the youth develop social skills for coping with both daily and difficult situations and interpersonal relationships; and to transition the youth to a less restrictive environment or home.

Out-of-State (OOS) Programs

DJS policy states that youth may not be placed out-of-state without the approval of the Secretary or designee. The Department adheres to Interstate Compact requirements and agreements with other states regarding requests for permission and notifications when youth are placed in another state. Maryland Law includes specific criteria for out-of-state placement including the condition that a youth's individualized needs cannot be met through in-state resources. Youth placed in out-of-state facilities are visited by DJS staff at least quarterly and parents/guardians are provided with opportunities to visit youth at least once per quarter. *Note: Although MD Law specifies numerous OOS program types (i.e. group homes, RTCs, hospitals, etc.), data will be presented on this page only for programs not already captured on a previous page in the Data Resource Guide.*

The Youth Center opened in 1966 as a 35-bed forestry camp on Backbone Mountain in Garrett County with funds appropriated by the General Assembly and became a youth center in 1977. In 2013, the Maryland State Department of Education assumed responsibility for the educational program and began providing academic and vocational services. Previously, DJS had provided the educational program. The school offers a 12-month schedule with six hours of daily instruction five days a week in English, mathematics, science, social studies, health and life skills, and individualized programs to prepare students for the GED exam. The College Program is offered in conjunction with Garrett College of Maryland. Students are screened through a referral, record review, and interview for acceptance into the program. Selected students are admitted for one college semester while in the DJS's care and earn a Maryland High School Diploma as well as up to fifteen college credits. Youth receive individual and group substance abuse interventions, individual therapy/counseling, and psychiatric services.

Mountain Quest is a 90-day Wilderness Program for committed males age 13-18 located at Green Ridge Youth Center. Mountain Quest is a first-time commitment program that provides youth time away from their families and communities giving them the opportunity to change their behavior while learning responsibility for their actions. The Mountain Quest program gives youth the opportunity to work on behaviors that will help them become successful in treatment when they return to the community. Mental health counseling is provided on an as-needed basis.

Mountain Quest provides six hours of MSDE instruction per day along with wilderness, team building, and communication skills. Social skills are taught five hours per week to give youth the skills needed for conflict resolution, victim awareness, improved family dynamics, and positive self-esteem. Family interaction is encouraged with visits, phone calls, Family Days, and family counseling.

J. DeWeese Carter Center opened as a secure residential facility in November 2011 to serve girls ages 14-18 who are committed to DJS. The program provides gender responsive, trauma-informed rehabilitation and treatment services. The Center implements CHALLENGE, a behavioral management program that establishes structure for an environment of respect and fairness conducive to treatment and rehabilitation. The program's goals for the girls include accepting responsibility for behavior, learning problem solving strategies and peer leadership skills, and developing/improving pro-social skills. Services include individual and group therapy, substance abuse education and treatment, health education, medication assessment and monitoring, and family therapy. The Maryland State Department of Education provides academic and vocational services. The school provides a 12-month schedule that includes six hours of daily instruction five days a week in English, mathematics, science, social studies, health, life skills, as well as individualized GED programs that prepare students for successful completion of a high school diploma examination. MSDE offers vocational programming in computer literacy and the ServSafe Program, both of which allow girls to earn certificates to help them secure employment at discharge.

Meadow Mountain Youth Center opened as a forestry camp for boys in June, 1958 and reopened as Meadow Mountain Youth Center in October, 1984. The Center offers an intensive out-patient program providing youth with at least nine hours of drug treatment weekly. Additionally, Meadow Mountain houses the Reflections Program which includes a high and low ropes challenge course, an aquatic challenge, and different outdoor activities. In 2013, the Maryland State Department of Education assumed responsibility for the educational program and began providing academic and vocational services. Previously, DJS had provided the educational program including an aquaculture vocational program in which students earned a 60 hour certificate with competencies needed to become an Aquaculture Technician I. The school offers a 12-month schedule that includes six hours of daily instruction five days a week in English, mathematics, science, social studies, health and life skills, as well as individualized programs to prepare students for the GED exam. Youth also receive individual counseling/therapy and psychiatric services if needed.

The success of the first forestry camp for boys at Green Ridge prompted the General Assembly to appropriate funds for additional facilities in 1956 (Chapter 98, Acts of 1956). Lonaconing Forestry Camp for Boys opened in December 1957 and was charged with the rehabilitation of adjudicated males 14-18 years of age. The Camp was renamed Savage Mountain Youth Center in 1977. In December 1999, the Center closed but was reopened in April 2001. Until June 2013, DJS operated the Savage Mountain School that provided regular classroom instruction, GED preparation, and an automotive vocational program in which students earned a 60-hour certificate listing the automotive competencies learned. As of June 2013, the Maryland State Department of Education assumed responsibility for the educational program and began providing academic and vocational services. The school offers a 12-month schedule that includes six hours of daily instruction five days a week in English, mathematics, science, social studies, health and life skills, as well as individualized programs that prepare students for successful completion of the GED.

Superintendent: James Washington

Hardware Secure - Region III - Western

Rated Capacity: 48 Males

6000 Cullen Drive
Sabillasville, MD 21780
301-739-7543

The Victor Cullen Center (VCC) was originally a sanatorium for tuberculosis patients named after the physician in charge of the institution, Dr. Victor F. Cullen. In July 2007, VCC reopened under state administration as a regional committed treatment center. VCC is a secure facility for delinquent males primarily serving youth ages 15-18 in a six- to nine-month treatment program for mental health issues and/or substance abuse. Presently, DJS oversees the treatment/residential programs while the Maryland State Board of Education oversees the education program. The Center implements CHALLENGE, a behavioral management program that establishes structure for an environment of respect and fairness conducive to treatment and rehabilitation. This includes reinforcing appropriate coping behaviors, providing group interventions in community problem-solving and pro-social skills, and offering opportunities to expand vocational and educational competencies. Behavioral health services include individual, group and family psychotherapy, psychiatric services including medication assessment and management, and emergency psychiatric/crisis intervention. Substance abuse services are also provided on multiple intensity levels dependent upon the youth's assessed need.

William Donald Schaefer House (State-Operated)

Superintendent: Johnitha McNair
Rated Capacity: 19 Males

Staff Secure - Region I - Baltimore City

907-909 Druid Park Lake Drive
Baltimore, MD 21217
410-230-3189

Opened in 1992, William Donald Schaefer House is situated across from Baltimore City's Druid Hill Park. It provides services to males ages 14-18 and is accredited by the Maryland Alcohol and Drug Abuse Administration and certified by the Department of Health and Mental Hygiene. Substance abuse treatment using the evidence-based *Seven Challenges* program is provided in a small, nurturing environment with intensive individual and group counseling daily. Youth attend alcohol and drug education groups five days a week, and health education classes given by the program's registered nurse. They also attend school five days per week, six hours per day overseen by the Maryland State Board of Education. Youth may earn credits to be transferred to their home schools upon release or prepare for the GED exam. They participate in community service projects and work with the teachers on skill-building and job preparation. Once a youth has completed residential treatment, he graduates to an intensive community aftercare program to maintain the support network necessary for a drug and alcohol free life.

Silver Oak Academy (SOA) is a private residential program owned and operated by Rite of Passage, Inc. SOA is an achievement-based program designed to highlight and develop positive pro-social skills and activities to assist students in transitioning to the community and being successful. The basis of achievement is measured through nine separate program elements. Silver Oak is privately owned and provides a residential placement option for youth referred by DJS. These students range in age from 14-18. Vocational training services include: food service & hospitality management, carpentry/electrical, construction/masonry, cosmetology/barbering, and electronics. SOA has a large campus that includes a year-round high school approved by Maryland State Department of Education, a competition gym (with wrestling and weight rooms), outdoor competition fields, and a running track. During FY 2014, the capacity at Silver Oak increased from 48 to 96.

Community-Based Family Therapy Programs for Committed & Probation Youth

DJS uses research-supported, community-based family therapy programs to address the needs of youth, thereby reducing the likelihood of recidivism, and to reduce out-of-home placements. Evidence-Based Services (EBS) constitute those designated as “model” programs by Blueprints for Healthy Youth Development (Center for the Study and Prevention of Violence at the University of Colorado Boulder) and currently include Functional Family Therapy (FFT), Multisystemic Therapy (MST), and Multidimensional Treatment Foster Care - Adolescent (MTFC-A). These services are family-based therapeutic models shown to be effective with youth involved with the juvenile justice system. DJS primarily targets FFT and MST for juveniles on probation or aftercare supervision in the community and utilizes MTFC-A for committed youth. In addition, Family Centered Treatment (FCT), provided by the Institute for Family Centered Services, Inc., is a family preservation model of in-home treatment, which helps families to learn and adopt positive behavioral patterns. FCT is also utilized with committed and probation youth.

Section V: Recidivism Rates

In November 2013, the Maryland Court of Appeals hosted the 19th Annual Maryland Department of Juvenile Services and Maryland State Department of Education Oratorical Contest. Student representatives from each of DJS' 14 facilities presented an original speech that they prepared, based on a poem entitled, "Equipment," by Edgar Albert Guest.

Measuring Recidivism Rates

Measuring recidivism for juvenile offenders is a vital part of program evaluation, and is an essential part of understanding the effectiveness of interventions to address delinquency. Though other outcomes are also important to study, including education, employment, substance abuse, and other non-offense-related outcomes, recidivism remains the key measure of success for juvenile justice programs.

POST-COMMITMENT RECIDIVISM

DJS has undertaken and published annual recidivism reports for many years, which focused on youth returning from committed out-of-home placements. These studies have been refined and expanded over the years to encompass all out-of-home committed programs (from foster placements to secure confinement), to include information on both juvenile and adult reoffending, and to show three levels of recidivating: a new alleged offense, whether that new offense resulted in conviction, and whether a new out-of-home placement resulted. Presenting all three levels of recidivism provides a fuller picture of the level of new involvement, and is less influenced by police or court practices which can skew results if too narrow a focus is given. Youth are followed for three years from release, and results are shown by year, level of recidivism, demographics, county, program type, and by individual program. It is important to note that although rates are presented by committed program, recidivism is affected by more than just the quality of the program. The quality of aftercare supervision after a youth is released, the community and/or family to which youth return, local economic opportunities, and other factors beyond the Department's control can all affect outcomes.

PROBATION RECIDIVISM

Committed out-of-home placements make up a relatively small portion of the cases managed by the Department. During the last fiscal year, DJS expanded the annual recidivism study to encompass youth on probation. This cohort includes all youth newly placed under DJS supervision by a juvenile court, most often under a probation order, though occasionally youth are placed under DJS in-home supervision under a commitment order. These cases are included in the study. Recidivism events are tracked from the date of the start of supervision for one, two, and three years, regardless of how long a youth remains under supervision. Cases supervised in-home under the Violence Prevention Initiative (VPI) program are included in this study group.

RECIDIVISM DEFINITION

The juvenile justice community has not reached a consensus on how best to define recidivism with one measure. Therefore, consistent with other studies, DJS focuses on several measures, including subsequent juvenile and/or criminal involvement of youth. Many youth under supervision or released from committed residential programs are 17 years old, and it is therefore important to include information from the adult criminal justice system and report both juvenile and adult recidivism rates. For purposes of these recidivism studies, a new arrest includes all new delinquent, criminal, status and traffic offenses, and new technical violations of probation not resulting from a new offense. It is important to note that only those new adjudications, convictions, commitments, and incarcerations that stem from a new arrest are included. Those stemming from offenses that occurred prior to the probation or commitment episode studied would not be counted. All recidivism rates are youth counts, taking into consideration the juvenile entry first and then the adult entry. If a youth is found to have recidivated in both the juvenile and adult systems, the recidivism event is counted once. It is, however, possible for a youth to show up in both the probation and committed study cohorts. The following chart includes data definitions used to analyze recidivism rates.

Cohort	Definition	Clock Starts	Assigned to	Data Tables Presented
Probation	Youth with a new probation disposition in FY, and youth committed to in-home supervision in FY, who had not previously been placed on probation or committed to DJS	Date of Probation or Committed Disposition	Region of Jurisdiction of Case Manager	Year, Race, Gender, Age, Region, County, VPI
Committed	Youth released from committed program in FY	Date of final release, excluding transfers	Final program from which youth was released	Year, Race, Gender, Age, Region, County, Program Type, Program

A Note to Readers

For purposes of this *Data Resource Guide*, rates will be combined for the juvenile and adult system into three overall categories using the below mentioned Juvenile and/or Criminal Justice Recidivism measures and labeled as:

1. Rearrest
2. Reconviction
3. Reincarceration

Recidivism	Definition	Date Used	Includes	Excludes	Data Source	Follow Up
Juvenile Arrest	Arrests referred to DJS	Complaint date within follow-up period	All complaints and violations of probation referred to DJS	Arrests in other states, arrests for charges occurring prior to release, arrests diverted by police and not referred to DJS	DJS ASSIST	12, 24, 36 Months
Adult Arrest	Adult arrest	Arrest date within follow-up period	All Maryland arrests under adult court jurisdiction	None	CJIS	12, 24, 36 Months
Juvenile Adjudication	Sustained delinquent adjudication of complaints included in re-referral count	Date of disposition within follow-up period	Sustained and adjudicated offenses and violations with delinquent findings	Continued cases	DJS ASSIST	12, 24, 36 Months
Adult Conviction	Conviction on charges included in adult arrest count	Date of disposition within follow-up period	Guilty verdict with sustained charges	None	CJIS	12, 24, 36 Months
Juvenile Commitment	Commitment stemming from complaints included in referral and adjudication count	Date of admission to program within follow-up period	New committed admission stemming from re-referral and re-adjudication, even if commitment order already existed from a prior commitment	Commitments not resulting in out-of-home placement	DJS ASSIST	12, 24, 36 Months
Adult Incarceration	Conviction on charges included in adult arrest count with jail time given either in the district or circuit court	Date of conviction within follow-up period	Guilty verdict with sustained charges and confinement in a local or district court	None	CJIS	12, 24, 36 Months

DATA SOURCES

Information from two different databases (juvenile and adult) is retrieved, processed, and compiled for each of the selected released cohorts. Data gathering involved the following procedures:

- A list of all youths released from the DJS committed residential programs is obtained from the Department's computerized system, known as ASSIST. In earlier years the Department used the computerized Information System for Youth Services (ISYS).
- A master file containing gender, race, date of birth, county of jurisdiction, region of jurisdiction, county of residence, region of residence, the last program name, and program type from which youth was released during the release cohort is created.
- Using the fields mentioned in the master file, sub-programs are created to obtain subsequent referrals, adjudications, and commitments with related fields. Each sub-program data set is compiled in such a way to help divide the follow-up time into one, two, and three years after release.
- To obtain the arrest and disposition information from the Criminal Justice Information System (CJIS), a list of all youth released from each year's cohort is arranged according to the specified data layout.
- CJIS uses DJS youth name, date of birth, race and gender as identification or index fields to match the data to provide criminal history record information. Before the program actually looks for the matches, it checks the input data for validity. A check is made if a valid match is found and no check is made for any invalid match against 'Identification /Index' field. These records are added to a text file and returned to DJS with the rest of the response data. This allows DJS to check the unmatched data and submit it for another match run.
 - Name match is as follows: Smith, Gregory will match with Smith, Gregory and Smith Greg. Smith, Greg will match with Smith, Greg and Smith, Gr, but not with Smith, Gregory. DJS youth names are given in full and checked for any abbreviation as Gr or Greg for example.
- Any youth who recidivated in both systems is included in the DJS recidivism and counted only once by discarding that youth in the adult system.

Overall Recidivism Rates for Committed Program Releases

12-, 24-, AND 36-MONTH JUVENILE AND/OR CRIMINAL JUSTICE RECIDIVISM RATES FOR FY 2011-2013 RELEASES, TRACKED THROUGH FY 2014

Follow-up Period	FY 2011			FY 2012			FY 2013		
	Rearrest	Re-conviction	Re-incarceration	Rearrest	Re-conviction	Re-incarceration	Rearrest	Re-conviction	Re-incarceration
12 Months	56.2%	20.6%	13.9%	52.5%	19.7%	14.6%	51.4%	19.7%	15.4%
24 Months	69.7%	36.1%	29.7%	68.0%	34.8%	28.0%	N/A	N/A	N/A
36 Months	76.0%	46.9%	40.3%	N/A	N/A	N/A	N/A	N/A	N/A

- Recidivism rates for FY 2013 releases at 12-months were:
 - Rearrest - 51.4%
 - Reconviction - 19.7%
 - Reincarceration - 15.4%
- When comparing the reoffending pattern at 12-months, rearrest rates were lowest for FY 2013 releases while reincarceration rates were highest. Reconviction rates were equal in FY 2012 and FY 2013 and were slightly higher during FY 2011.

- Demographic data for 12-month recidivism rates are presented in the table above.
 - Males had higher recidivism rates than females for all measures.
 - At rearrest, Black youth had the highest rate. At reconviction, Hispanic/Other youth had the highest rate. At reincarceration, all racial/ethnic groups had similar rates with Black youth having a slightly higher rate.
 - Some age groups comprise a small number of youth. Therefore, the reoffense of a few can strongly influence the overall rate. For this reason, caution should be used when attempting to compare age groups.

Note: All data represent both juvenile and/or adult recidivism. Data may not be comparable to previous Data Resource Guides.

- For total Foster Care releases (including treatment and in-home foster care) between FY 2011 and FY 2013, rearrest rates increased by 5.2% and reincarceration rates by 0.9%. Reconviction rates decreased by 5.2%.

Note: Throughout this section, programs that had no releases within a fiscal year will have N/A reported for all recidivism measures.

*Some programs/facilities serve a small number of youth each year; therefore, reoffenses of a few juveniles may result in a seemingly high overall reoffense rate. For this reason, numbers rather than rates are presented at the program level. Data may not be comparable to previous Data Resource Guides.

Note: The probation cohort includes youth placed on probation (not youth released from probation) and committed community youth. Therefore, recidivism is measured starting at the disposition date.

- Demographic data for 12-month recidivism rates are presented in the table above.
 - Males had higher recidivism rates than females for all measures.
 - Black youth had the highest rates for all measures.
 - Some age groups comprise a small number of youth. Therefore, the reoffense of a few can strongly influence the overall rate. For this reason, caution should be used when attempting to compare age groups.

Data may not be comparable to previous Data Resource Guides.

*Since the probation cohort includes youth who were not previously placed in a committed out-of-home program, "incarceration" reflects the first commitment to an out-of-home placement or incarceration in the adult system.

- When examining the percentages presented above, it is important to consider the number of releases. Some counties have a small number of releases; therefore if a few youth reoffend, this can greatly impact the recidivism rate.

Data may not be comparable to previous Data Resource Guides.

*Since the probation cohort includes youth who were not previously placed in a committed out-of-home program, "incarceration" reflects the first commitment to an out-of-home placement or incarceration in the adult system.

PROBATION - VPI RECIDIVISM

The table below shows recidivism outcomes for a subset of the probation cohort who were assigned to VPI community supervision during their probation term. These data should not be used to generalize the VPI program as a whole. The analysis excludes VPI participants in placement, under aftercare supervision as well as probation youth with a prior probation disposition. As in the overall probation cohort analysis, the follow-up period begins on the disposition date.

- Some regions have a small number of youth in the analysis group. Therefore the reoffense of a few can strongly influence the overall rate. For this reason, it is not advisable to compare data across regions.
- Between FY 2011 and FY 2013, statewide:
 - Rearrest rates decreased 4.8%.
 - Reconviction rates increased 1.3%.
 - Incarceration rates decreased by 0.9%.

Data may not be comparable to previous Data Resource Guides.

*Since youth in VPI are part of the probation cohort that includes youth who were not previously placed in a committed out-of-home program, "incarceration" reflects the first commitment to an out-of-home placement or incarceration in the adult system.

Hardware Secure		\$292.00 - \$383.00	\$348.70

**Per Diem Rates* are presented for privately-operated programs that DJS reimburses for service using a single rate. Rates are not presented for programs that are funded in whole or in part by other sources such as private health care insurance or Medicaid. ICFA and Psychiatric Hospitals are excluded as a class for this reason, and rates for Residential Treatment Centers are based on 6 of 11 programs utilized by DJS.

**Average per diem rate should not be used to calculate the total cost by program type given the range of per diem rates. The average per diem rate does not take into account individual program utilization and the total cost may vary substantially based on the number of youth who actually participate in each program.

***Educational costs are not included in per diem rates. Educational costs may vary within a program depending on the combination of services provided (e.g., regular education vs. special education) and the educational needs of youth placed.

DISPROPORTIONATE MINORITY CONTACT (DMC) STRATEGIES AND CONTACT INFORMATION

Effective DMC reduction strategies prevent entry and further involvement of youth of color in the juvenile justice system and eliminate disparate treatment of these youth in system decision-making. Efforts that are most successful also include strategies that increase cultural competence and responsiveness to specific needs of system-involved youth and families of color. These strategies include the following:

- School and Community-Based Diversion
- Detention Risk Screening
- Alternatives to Secure Detention
- Community Alternatives to Placement
- Cultural and Linguistic Competence
- Community Engagement
- Family Involvement
- Graduated Sanctions

RELATIVE RATE INDEX (RRI)

The Relative Rate Index (RRI) is a measure of Disproportionate Minority Contact (DMC) with the juvenile justice system. It is a standardized tool for measuring how ethnic minorities compare with white youth at various contact points (arrest, court referral, etc.) The RRI was developed by the National Center for Juvenile Justice, with funding from the Office of Juvenile Justice and Delinquency Prevention (OJJDP), Office of Justice Programs, U.S. Department of Justice. For more detailed information, see: <http://www.ojjdp.gov/ojstatbb/dmcdcb/asp/whatis.asp>

DEFINITIONS FOR KEY CONTACT POINTS

The table below shows each key contact point included in the tables that follow along with a brief explanation of each point. Understanding each contact point and how it is defined in the calculations will provide the basis for proper interpretation of the rates.

Contact Point	Definition
Population	Population of youth ages 11 - 17. Data from MD Dept. of Planning. <i>Note: DJS uses 11-17 as a population denominator due to the low number of cases under 11</i>
Arrests	Arrests of juveniles by law enforcement. Data from MD State Police. Rate is based on youth in the general population.
Referrals	Juvenile complaints referred to DJS intake, from police or other sources, including delinquent and non-delinquent offenses, as recorded in ASSIST. Rate is per arrest.
Diversion	Complaints diverted, (resolved or informally adjusted to pre-court supervision), without formal petition. Rate is per referral.
Detention	Cases resulting in detention both pre-disposition or pending placement, but does not include youth ejected to detention from a committed placement. Rate is per referral.
Petitioned	Complaints resulting in juvenile court petitions. Rate is per referral.
Delinquent	Complaints resulting in delinquent findings. Rate is per petition.
Probation	Probation dispositions. Rate is per delinquent finding.
Confinement	Youth placed in Secure Committed program: Victor Cullen, Carter Center or secure private out of state programs. Rate is per delinquent finding.
Transferred	Juvenile petitions waived up to adult court. Does not include charges under original adult jurisdiction. Rate is per petition.

RRI TABLE FOR ALL MINORITY YOUTH

The data presented here shows the RRI for minority youth compared to white youth. An RRI of 1.0 indicates no disparity at that decision point. A higher value means more disparity (higher minority over-representation), and a lesser value means less disparity (under-representation). The RRI for each decision point is based on the number of youth of each race represented at that point compared with the number at the previous decision point.

RATES OF CONTACT FOR ALL YOUTH

This table shows the number and rate of representation for all youth, regardless of color, at each key juvenile justice decision point. The rates are based on the general population for this table, rather than based on the previous decision point.

¹ Rates are calculated for each decision point based on FY 2013 arrests, the latest available from Maryland State Police, and July 2013 population data.

* Minority youth includes: African American, Asian or Pacific Islander, American Indian or Alaskan Native, Other/Unknown. Hispanic youth are counted as White because Maryland state arrest data were collected as part of the FBI's Uniform Crime Report effort and utilize the FBI's racial designations (White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander). Data on Hispanic origin are not collected.

⁺ Hispanic youth are counted as minority youth in this column because Hispanic origin is included in the DJS ASSIST measure of race.

- Statistically significant results are shaded; Results that are not statistically significant are shown in regular font
- Insufficient number of cases for analysis are shown as **; An RRI of 1.0 indicates no disproportional contact. A rate higher than 1.0 indicates that minority youth are disproportionately over-represented at that decision point, and a rate below 1.0 shows they are under-represented.

• This table calculates the rate of DJS contact for all youth at each stage, compared with the general population (ages 11-17). For example, for every 10,000 youth in Baltimore City, there are 291 youth detained, and in Prince George's County it is 112 per 10,000 youth.

Committed Placement Information

A range of out-of-home program options (or placements) have been developed for committed youth. Community-based program options include placement in a Foster Home, Group Home, or Independent Living Program. Placements in non-community settings include Intermediate Care Facilities for Addictions (ICFA), Residential Treatment Centers (RTC), DJS-operated Youth Centers, and secure confinement facilities. DJS operates seven facilities in Maryland and contracts with others both in-state and out-of-state.
